Milwaukee, WI 53202

INVESTMENT STRATEGY PROCESS

The Fund employs a long/short investment strategy in an attempt to achieve capital appreciation and manage risk. The Fund takes long positions in securities Otter Creek believes to be undervalued and short positions in securities Otter Creek believes to be overvalued. The Fund's objective is to provide long-term capital appreciation.

PERFORMANCE

	MTD ¹	QTD ¹	YTD ¹	Since Inception ¹	1-Year ²	3-Year ²	Since Inception ²
Institutional Class (OTTRX)	2.33%	2.33%	2.33%	18.88%	-3.50%	1.91%	3.83%

² Annualized as of previous quarter-end December 31, 2017

Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The current performance may be lower or higher than the performance data quoted. Performance data current to the most recent month end may be obtained by calling 855-681-5261.

Performance data quoted does not reflect the redemption fee. If reflected, total returns would be reduced.

The Fund's investment adviser has contractually agreed to waive a portion or all of its management fees and pay Fund expenses (excluding acquired fund fees and expenses ("AFFE"), interest, taxes, interest and dividend expense on securities sold short and extraordinary expenses) to cap the fees at 1.70% for the institutional class and 1.95% for the investor class until at least February 28, 2018. The expense ratios as per the previous prospectus were 2.79% gross and 2.76% net for the institutional class and 3.09% gross and 3.06% net for the investor class. The net expense ratios are applicable to investors. The expense ratios are based on the estimated amounts and may not reflect the actual expense ratios.

This chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since inception on December 30, 2013. It assumes reinvestment of dividends and capital gains, but does not reflect the effect of any applicable sales charge or redemption fees. This chart does not imply any future performance.

Month End Attribution

The Otter Creek Long/Short Opportunity Fund Institutional Class appreciated 2.33% in January while the S&P 500 appreciated 5.72%.

For the month, the portfolio's delta-adjusted exposure averaged approximately 16% net long. Our long portfolio appreciated 5.2% while our short portfolio (inclusive of puts) depreciated 2.7%.

The largest winner for the month was our short position in Winnebago, which added 0.58%. Winnebago and other companies in the recreation space declined during the month as concerns began to grow surrounding excess dealer inventory and the impact higher interest rates may have on demand. Although we have slightly reduced our exposure, covering some stock and selling some of our deep in the money puts, we continue to be short Winnebago. In addition, our third largest winner during the month was a short position in LCI Industries (LCII), a supplier in the RV space, which contributed 0.35%. As a supplier to the space, LCII may face difficulty with rising input costs such as raw materials and wages. The largest winner on the long side was our position in FLIR Systems, a beneficiary of a possible increase in military spending. We have highlighted FLIR Systems and Leidos Holdings over the last few months as two of our larger positions in the fund that we believe will benefit from an increase in military spending under President Trump.

The largest detractor during the month was our short position in Shopify Inc., which cost the fund 0.39%. Shopify appreciated during the month as investors flocked to technology and growth related names and ETFs. We continue to be short Shopify. The largest loser on the long side during the month was our position in Jack in the Box Inc. which cost the fund approximately 0.12%. In light of recent activist involvement, we continue to have a small long position in Jack in the Box as we believe the company is a potential take out candidate after spinning off its Qdoba business earlier this year.

Portfolio Level Commentary

Since the end of December, our gross delta adjusted exposure has decreased slightly to 159%. Our net long exposure increased slightly from 12% to 16%, delta adjusted, at month end. In aggregate, our put exposure currently represents roughly 3.3% of capital.

As stewards of capital we feel it is our duty to both protect and compound capital regardless of the market's direction.

Quarterly Webcast

Portfolio Managers, Tyler Walling and Mike Winter, are scheduled to host a webcast on February 8th, 2018 to review the fourth quarter and our outlook for the remainder of the year. During the presentation they will discuss our investment process, Q4 attribution in greater detail and our investment thesis on several positions and investment themes both new and old. A replay of the call and presentation will be available for review on our website, <http://ottercreekfunds.com/resources.html>.

The members of Otter Creek appreciate your support and trust. If you have any questions concerning the fund or firm, please do not hesitate to reach out.

The Standard and Poor's 500 Index (S&P 500) is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. The Morningstar Long/Short Equity Category is a composite of returns produced by Morningstar which can be used to compare the returns of other mutual funds in the same category. © 2017 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. It is not possible to invest directly in either index. Delta is the ratio comparing the change in price of the underlying asset to the corresponding change in the price of a derivative. Standard deviation is a measure of the dispersion of a set of data from its mean. Correlation is a statistical measure of how two securities move in relation to each other. The correlation coefficient (r) is a measure that determines the degree to which two variable's movements are associated. The coefficient of determination (r²) is a measure used in statistical model analysis to assess how well a model explains and predicts future outcomes.

Past Performance does not guarantee future results.

Fund holdings are subject to change and should not be considered a recommendation to buy or sell any security.

Otter Creek Advisors, LLC is the Advisor to the Otter Creek Long/Short Opportunity Fund which is distributed by Quasar Distributors, LLC.

The Fund's investment objectives, risks, charges, and expenses must be considered carefully before investing. The statutory and summary prospectuses contain this and other important information about the investment company, and may be obtained by calling 1-855-681-5261 or visiting www.ottercreekfunds.com. Read carefully before investing.

Mutual fund investing involves risk; Principal loss is possible. Investments in debt securities typically decrease when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher rated securities. Investments in Asset-Backed and Mortgage-Backed securities include additional risks that investors should be aware of including credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. Investments in foreign securities involve political, economic, and currency risks, greater volatility, and differences in accounting methods. The Fund may use certain types of exchange traded funds or investment derivatives. Derivatives involve risks different from, and in certain cases, greater than the risks presented by more traditional investments. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. ETF investments involve additional risks such as the market price trading at a discount to its net asset value, an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a fund's ability to sell its shares. Short sales of securities involves the risk that losses may exceed the original amount invested. Investments in Master Limited Partnerships (MLPs) which concentrate investments in the natural resource sector and are subject to the risks of energy prices and demand and the volatility of commodity investments. Damage to facilities and infrastructure of MLPs may significantly affect the value of an investment and may incur environmental costs and liabilities due to the nature of their business. MLPs are subject to significant regulation and may be adversely affected by changes in the regulatory environment. Investments in IPOs are subject to market and liquidity risks and such investments may have a magnified impact on the performance of the Fund. To qualify for treatment as a regulated investment company ("RIC") under the Internal Revenue Code ("Code"), the Fund must meet certain income source, asset diversification and annual distribution requirements. If, in any year, the Fund fails to qualify as a RIC for any reason, the Fund would be taxed as an ordinary corporation and would become (or remain) subject to corporate income tax. The resulting corporate taxes could substantially reduce the Fund's net assets, the amount of income available for distribution and the amount of the Fund's distributions.

Earnings growth is not a measure of the Fund's future performance.
