

STATEMENT OF ADDITIONAL INFORMATION
February 28, 2018

OTTER CREEK LONG/SHORT OPPORTUNITY FUND

Institutional Class – Ticker: **OTTRX**

Investor Class – Ticker: **OTCRX**

11300 US Highway 1, Suite 500
Palm Beach Gardens, Florida 33408
1-855-681-5261

This Statement of Additional Information (“SAI”) is not a prospectus and it should be read in conjunction with the related Prospectus (dated February 28, 2018) of the Otter Creek Long/Short Opportunity Fund, (the “Fund”), a series of Professionally Managed Portfolios (the “Trust”). Otter Creek Advisors, LLC (the “Advisor”) is the advisor to the Fund. A copy of the Prospectus is available on the Advisor’s website at www.ottercreekfunds.com or by calling the number listed above.

The Fund’s most recent annual report to shareholders is available, without charge, upon request by calling the number listed above. The financial statements, accompanying notes and report of independent registered public accounting firm appearing in the annual report are incorporated into this SAI by reference to the Fund’s annual report as filed with the Securities and Exchange Commission (“SEC”). This SAI incorporates by reference the Fund’s Annual Report to Shareholders for the fiscal year ended October 31, 2017. A free copy of the Prospectus or Annual Report can be obtained by writing the transfer agent at U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, Wisconsin 53201-0701, or by calling Shareholder Services at 1-855-681-5261.

THE TRUST

The Trust is a Massachusetts business trust organized on February 24, 1987 and is registered with the SEC as an open-end management investment company. Prior to May 1991, the Trust was known as the Avondale Investment Trust. The Trust's Agreement and Declaration of Trust (the "Declaration of Trust") permits the Trust's Board of Trustees (the "Board") to issue an unlimited number of full and fractional shares of beneficial interest, without par value, which may be issued in any number of series. The Trust consists of various series that represent separate investment portfolios. The Board may from time to time issue other series, the assets and liabilities of which will be separate and distinct from any other series. This SAI relates only to the Fund.

The shareholders of a Massachusetts business trust could, under certain circumstances, be held personally liable as partners for its obligations. However, the Declaration of Trust contains an express disclaimer of shareholder liability for acts or obligations of the Trust.

The Declaration of Trust also provides for indemnification and reimbursement of expenses out of Fund assets for any shareholder held personally liable for obligations of the Fund or the Trust. The Declaration of Trust provides that the Trust shall, upon request, assume the defense of any claim made against any shareholder for any act or obligation of the Fund or the Trust and satisfy any judgment thereon. All such rights are limited to the assets of the Fund. The Declaration of Trust further provides that the Trust may maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, trustees, officers, employees and agents to cover possible tort and other liabilities. However, the activities of the Trust as an investment company would not likely give rise to liabilities in excess of the Trust's total assets. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance exists and the Fund themselves are unable to meet their obligations.

The Fund commenced operations on December 30, 2013. The Fund's Prospectus and this SAI are a part of the Trust's Registration Statement filed with the SEC. Copies of the Trust's complete Registration Statement may be obtained from the SEC upon payment of the prescribed fee or may be accessed free of charge at the SEC's website at www.sec.gov.

The Fund is a series of the Trust. The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor do they share the same investment advisor with any other series of the Trust. The Fund's Prospectus and this SAI are a part of the Trust's Registration Statement filed with the SEC. Copies of the Trust's complete Registration Statement may be obtained from the SEC upon payment of the prescribed fee or may be accessed free of charge at the SEC's website at www.sec.gov.

The Fund is managed by Otter Creek Advisors, LLC, a privately owned Florida corporation that became an SEC registered investment adviser in 2014. Prior to February 27, 2015, the Fund was managed by an affiliate of the Advisor, Otter Creek Management, Inc., a privately owned Delaware corporation that became an SEC registered investment adviser in 2003.

INVESTMENT POLICIES AND RISKS

The following information supplements the discussion of the Fund's investment objective and principal investment strategies as set forth in the Prospectus. There can be no assurance the Fund will achieve its investment objective. The Fund may invest in the following types of investments as indicated, each of which is subject to certain risks, as discussed below.

The Fund is diversified. This means that for 75% of its total assets, the Fund may not invest more than 5% of its total assets in securities of a single issuer or hold more than 10% of the outstanding voting shares of a single issuer. Under applicable federal securities laws, the diversification of a mutual fund's holdings is measured at the time a fund purchases a security. However, if a fund purchases a security and holds it for a period of time, the security may become a larger percentage of the fund's total assets due to movements in the financial markets. If the market affects several securities held by a fund, the fund may have a greater percentage of its assets invested in securities of fewer issuers. Accordingly, a fund would be subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities despite the fund qualifying as a diversified fund under applicable federal securities laws.

Market and Regulatory Risk

Events in the financial markets and economy may cause volatility and uncertainty and affect performance. Such adverse effect on performance could include a decline in the value and liquidity of securities held by the Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value ("NAV"), and an increase in Fund expenses. It may also be unusually difficult to identify both investment risks and opportunities, in which case investment objectives may not be met. Market events may affect a single issuer, industry, sector, or the market as a whole. Traditionally liquid investments may experience periods of diminished liquidity. During a general downturn in the financial markets, multiple asset classes may decline in value and the Fund may lose value, regardless of the individual results of the securities and other instruments in which the Fund invests. It is impossible to predict whether or for how long such market events will continue, particularly if they are unprecedented, unforeseen or widespread events or conditions. Therefore it is important to understand that the value of your investment may fall, sometimes sharply and for extended periods, and you could lose money.

Governmental and regulatory actions, including tax law changes, may also impair portfolio management and have unexpected or adverse consequences on particular markets, strategies, or investments. Policy and legislative changes in the United States and in other countries are affecting many aspects of financial regulation, and may in some instances contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time. In addition, economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Special Risks Related to Cyber Security

The Fund and its service providers are susceptible to cyber security risks that include, among other things, theft, unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential and highly restricted data; denial of service attacks; unauthorized access to relevant systems, compromises to networks or devices that the Fund and its service providers use to service the Fund's operations; or operational disruption or failures in the physical infrastructure or operating systems that support the Fund and its service providers. Cyber-attacks against or security breakdowns of the Fund or its service providers may adversely impact the Fund and its shareholders, potentially resulting in, among other things, financial losses; the inability of Fund shareholders to transact business and the Fund to process transactions; inability to calculate the Fund's NAV; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs; and/or additional compliance costs. The Fund may incur additional costs for cyber security risk management and remediation purposes. In addition, cyber security risks may also impact issuers of securities in which the Fund invests, which may cause the Fund's investment in such issuers to lose value. There can be no

assurance that the Fund or its service providers will not suffer losses relating to cyber-attacks or other information security breaches in the future.

Equity Securities

The Fund may invest in equity securities consistent with its investment objective and strategies. Common stocks, preferred stocks and convertible securities are examples of equity securities in which the Fund may invest.

All investments in equity securities are subject to market risks that may cause their prices to fluctuate over time. Historically, the equity markets have moved in cycles and the value of the securities in the Fund's portfolio may fluctuate substantially from day to day. Owning an equity security can also subject the Fund to the risk that the issuer may discontinue paying dividends.

To the extent the Fund invests in the equity securities of small- and medium-sized companies, they will be exposed to the risks of small- and medium-sized companies. Such companies often have narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies. Furthermore, those companies often have limited product lines, or services, markets, or financial resources, or are dependent on a small management group. In addition, because these stocks are not well-known to the investing public, do not have significant institutional ownership, and are followed by relatively few security analysts, there will normally be less publicly available information concerning these securities compared to what is available for the securities of larger companies. Adverse publicity and investor perceptions, whether based on fundamental analysis, can decrease the value and liquidity of securities held by the Fund. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund's portfolio.

Common Stock

A common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company's business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which the Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to the Fund as a holder of common stock. It is possible that all assets of that company will be exhausted before any payments are made to the Fund.

Preferred Stock

Preferred stocks are equity securities that often pay dividends at a specific rate and have a preference over common stocks in dividend payments and liquidation of assets. A preferred stock has a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.

Rights and Warrants

The Fund may invest in rights or warrants. Rights and warrants entitle the holder to buy equity securities at a specific price for a specific period of time. Rights and warrants may be considered more speculative than certain other types of investments in that they do not entitle a holder to dividends or voting rights with respect to the underlying securities that may be purchased nor do they represent any rights in the assets of the issuing company. Also, the value of a right or warrant does not necessarily

change with the value of the underlying securities and a right or warrant ceases to have value if it is not exercised prior to the expiration date.

Convertible Securities

The Fund may invest in convertible securities. Convertible securities (such as debt securities or preferred stock) may be converted into or exchanged for a prescribed amount of common stock of the same or different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or dividends paid on preferred stock until the convertible stock matures or is redeemed, converted or exchanged. While no securities investment is without some risk, investments in convertible securities generally entail less risk than the issuer's common stock. However, the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security. In addition to the general risk associated with equity securities discussed above, the market value of convertible securities is also affected by prevailing interest rates, the credit quality of the issuer and any call provisions. While convertible securities generally offer lower interest or dividend yields than nonconvertible debt securities of similar quality, they do enable the investor to benefit from increases in the market price of the underlying common stock.

Foreign Securities

The Fund may invest in U.S. dollar denominated foreign securities American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), Global Depositary Receipts ("GDRs") and foreign equity securities. In determining whether a company is foreign, the Advisor will consider various factors including where the company is headquartered, where the company's principal operations are located, where the company's revenues are derived, where the principal trading market is located and the country in which the company is legally organized. The weight given to each of these factors will vary depending upon the circumstances. Investments in foreign securities may involve a greater degree of risk than those in domestic securities.

American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts. These securities may not necessarily be denominated in the same currency as the securities for which they may be exchanged. These are certificates evidencing ownership of shares of a foreign-based issuer held in trust by a bank or similar financial institution. Designed for use in U.S. securities markets, ADRs are alternatives to the purchase of the underlying securities in their national market and currencies, while EDRs and GDRs are European and Global receipts evidencing a similar arrangement. ADRs, EDRs and GDRs may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depositary, whereas a depositary may establish an unsponsored facility without participation by the issuer of the depositary security. Holders of unsponsored depositary receipts generally bear all the costs of such facilities and the depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts of the deposited securities.

Investing in foreign securities involves certain risks not ordinarily associated with investments in securities of domestic issuers. Foreign securities markets have, for the most part, substantially less volume than the U.S. markets and securities of many foreign companies are generally less liquid and their prices more volatile than securities of U.S. companies. There is generally less government supervision and regulation of foreign exchanges, brokers and issuers than in the U.S. The rights of investors in certain foreign countries may be more limited than those of shareholders of U.S. issuers and the Fund may have greater difficulty taking appropriate legal action to enforce its rights in a foreign court than in a U.S. court. Investing in foreign securities also involves risks associated with government, economic, monetary, and fiscal policies (such as the adoption of protectionist trade measures), possible foreign

withholding taxes on dividends and interest payable to the Fund, possible taxes on trading profits, inflation, and interest rates, economic expansion or contraction, and global or regional political, economic or banking crises. Furthermore, there is the risk of possible seizure, nationalization or expropriation of the foreign issuer or foreign deposits and the possible adoption of foreign government restrictions such as exchange controls. Also, foreign issuers are not necessarily subject to uniform accounting, auditing and financial reporting standards, practices and requirements comparable to those applicable to domestic issuers and as a result, there may be less publicly available information on such foreign issuers than is available from a domestic issuer.

In addition, the Fund may invest in foreign securities of companies that are located in developing or emerging markets. Investing in securities of issuers located in these markets may pose greater risks not typically associated with investing in more established markets such as increased risk of social, political and economic instability. Emerging market countries typically have smaller securities markets than developed countries and therefore less liquidity and greater price volatility than more developed markets. Securities traded in emerging markets may also be subject to risks associated with the lack of modern technology, poor infrastructures, the lack of capital base to expand business operations and the inexperience of financial intermediaries, custodians and transfer agents. Emerging market countries are also more likely to impose restrictions on the repatriation of an investor's assets and even where there is no outright restriction on repatriation, the mechanics of repatriations may delay or impede the Fund's ability to obtain possession of its assets. As a result, there may be an increased risk or price volatility associated with the Fund's investments in emerging market countries, which may be magnified by currency fluctuations.

Dividends and interest payable on the Fund's foreign securities may be subject to foreign withholding tax. The Fund may also be subject to foreign taxes on its trading profits. Some countries may also impose a transfer or stamp duty on certain securities transactions. The imposition of these taxes will increase the cost to the Fund of investing in those countries that impose these taxes. To the extent that, as anticipated, such taxes are not offset by credits or deductions available to shareholders in the Fund under U.S. tax law, they will reduce the net return to the Fund's shareholders. It is not anticipated that the Fund will be eligible to pass through to shareholders a federal tax credit or federal tax deduction related to any foreign taxes borne by the Fund.

To the extent the Fund invests in securities denominated in foreign currencies, the Fund will be subject to the risk that a change in the value of any such currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of the Fund's assets denominated in that currency. Investing in foreign denominated securities may also result in transaction costs incurred in connection with conversions between various currencies. In addition, only a limited market currently exists for hedging transactions relating to currencies in certain emerging markets and securities transactions undertaken in foreign markets may not be settled promptly, subjecting the Fund to the risk of fluctuating currency exchange rates pending settlement.

Other Investment Companies

The Fund may invest in shares of other registered investment companies, including money market mutual funds, in accordance with the limitations established under the Investment Company Act of 1940, as amended (the "1940 Act"). Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, the Fund becomes a shareholder of that investment company. As a result, Fund shareholders indirectly will bear the Fund's proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses Fund shareholders directly bear in connection with the Fund's own operations.

The Fund currently intends to limit its investments in securities issued by other investment companies so that not more than 3% of the outstanding voting stock of any one investment company (other than money market funds) will be owned by the Fund, or its affiliated persons, as a whole. In addition to the advisory and operational fees the Fund bears directly in connection with its own operation, the Fund would also bear its pro rata portions of each other investment company's advisory and operational expenses.

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in securities of other registered investment companies. The acquisition of shares by the Fund in other registered investment companies is therefore subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by Rule and/or an exemptive order obtained by the other registered investment companies that permits the Fund to invest in the other registered investment companies beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that the Fund enter into an agreement with the other registered investment companies regarding the terms of the investment.

In accordance with Section 12(d)(1)(F) and Rule 12d1-3 of the 1940 Act, the provisions of Section 12(d)(1) shall not apply to securities purchased or otherwise acquired by the Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the Fund and all affiliated persons of the Fund; and (ii) the Fund is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price including a sales load or service fee that exceeds the limits set forth in Rule 2341 of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to a fund of funds (e.g., 8.5%).

Exchange-Traded Funds

The Fund may invest in Exchange-Traded Funds ("ETFs"). ETFs are typically open-end investment companies that are bought and sold on a national securities exchange. An ETF is similar to a traditional mutual fund, but trades at different prices during the day on a security exchange like a stock. Similar to investments in other investment companies discussed above, the Fund's investments in ETFs will involve duplication of advisory fees and other expenses since the Fund will be investing in another investment company. In addition, the Fund's investment in ETFs is also subject to its limitations on investments in investment companies discussed above. To the extent the Fund invests in ETFs which focus on a particular market segment or industry, the Fund will also be subject to the risks associated with investing in those sectors or industries. The shares of the ETFs in which the Fund will invest will be listed on a national securities exchange and the Fund will purchase or sell these shares on the secondary market at its current market price, which may be more or less than its net asset value per share ("NAV"). Investors in the Fund should be aware that index-based ETFs are subject to "tracking risk," which is the risk that an ETF will not be able to replicate exactly the performance of the index it tracks.

As a purchaser of ETF shares on the secondary market, the Fund will be subject to the market risk associated with owning any security whose value is based on market price. ETF shares historically have tended to trade at or near their NAV, but there is no guarantee that they will continue to do so. Unlike traditional mutual funds, shares of an ETF may be purchased and redeemed directly from the ETFs only in large blocks (typically, 50,000 shares or more) and only through participating organizations that have entered into contractual agreements with the ETF. The Fund does not expect to enter into such agreements and therefore will not be able to purchase and redeem its ETF shares directly from the ETF.

Money Market Mutual Funds

The Fund may invest in money market mutual funds in connection with its management of daily cash positions or for temporary defensive purposes. Money market mutual funds are regulated

investment companies under the 1940 Act and the Fund will invest in money market funds in accordance with applicable rules and regulations with respect to investments in other investment companies. Please note that in addition to the advisory and operational fees the Fund pays in connection with its own operations, to the extent the Fund invests in money market funds, the Fund will also bear its pro rata portion of each such money market fund's fees and expenses.

Illiquid and Restricted Securities

As a non-principal strategy, the Fund may not invest more than 15% of its net assets in securities that are illiquid. The Advisor will determine a security to be illiquid if it cannot be sold or disposed of in the ordinary course of business within seven days at the value at which the Fund has valued the security. Illiquid securities present the risks that the Fund may have difficulty valuing these holdings and/or may be unable to sell these holdings at the time or price desired.

There are generally no restrictions on the Fund's ability to invest in restricted securities (that is, securities that are not registered pursuant to the Securities Act of 1933, as amended (the "1933 Act")), except to the extent such securities may be considered illiquid. Securities issued pursuant to Rule 144A of the Securities Act ("Rule 144A securities") will be considered liquid if determined to be so under procedures adopted by the Board of Trustees. The Advisor is responsible for making the determination as to the liquidity of restricted securities (pursuant to the procedures adopted by the Board of Trustees).

Factors considered in determining whether a security is illiquid may include, but are not limited to: the frequency of trades and quotes for the security; the number of dealers willing to purchase and sell the security and the number of potential purchasers; the number of dealers who undertake to make a market in the security; the nature of the security, including whether it is registered or unregistered, and the market place; whether the security has been rated by a nationally recognized statistical rating organization ("NRSRO"); the period of time remaining until the maturity of a debt instrument or until the principal amount of a demand instrument can be recovered through demand; the nature of any restrictions on resale; and with respect to municipal lease obligations and certificates of participation, there is reasonable assurance that the obligation will remain liquid throughout the time the obligation is held and, if unrated, an analysis similar to that which would be performed by an NRSRO is performed. If a restricted security is determined to be liquid, it will not be included within the category of illiquid securities. Investing in Rule 144A securities could have the effect of increasing the level of a Fund's illiquidity to the extent that the Fund, at a particular point in time may be unable to find qualified institutional buyers interested in purchasing the securities. The Fund is permitted to sell restricted securities to qualified institutional buyers.

Limitations on the resale of illiquid and restricted securities may have an adverse effect on the marketability of portfolio securities and the Fund might be unable to dispose of illiquid and restricted securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requirements. The Fund might also have to register such restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

Short Sales

The Fund may engage in short sales of securities, provided the securities are fully listed on a national securities exchange. In a short sale, the Fund sells a security it does not own, in anticipation of a decline in the market value of the security. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing it at the market price at the time of replacement. This price may be more or less than the price at which the security was sold by the Fund. The Fund will incur a loss on a short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed

security. The Fund will realize a gain if the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund may be required to pay in connection with the short sale.

Typically, the Fund will segregate liquid assets, which are marked-to-market daily, equal to the difference between (a) the market value of the securities sold short at the time they were sold short and (b) the value of the collateral deposited with the broker in connection with the short sale (not including the proceeds from the short sale). While the short position is open, the Fund must maintain segregated assets at such a level that the amount segregated plus the amount deposited with the broker as collateral equal the current market value of the securities sold short.

The dollar amount of short sales at any one time (not including short sales against the box) may not exceed 100% of the net assets of the Fund, and it is expected that normally the dollar amount of such sales will not exceed 75% of the net assets of the Fund.

Fixed Income Securities

General

The Fund may invest a portion of its assets in fixed income securities. Examples of such securities are described below.

Government Agency Securities

Government agency securities, often called agencies, are indirect obligations of the U.S. government, and are issued by federal agencies and government-sponsored corporations under authority from Congress. Government agency securities may be backed by the full faith and credit of the federal government, which is the case with Government National Mortgage Association and Small Business Administration certificates, but are more often issued or guaranteed by the sponsoring agency. Examples of government agency securities include Export-Import Bank of the United States, the Federal Home Loan Banks, and the Federal Farm Credit System Banks.

Government-Sponsored Enterprises

Government-sponsored enterprises are characterized as being privately owned and publicly chartered. These enterprises were created by the U.S. government to help certain important sectors of the economy reduce their borrowing costs. The U.S. government does not directly back government sponsored enterprise securities, although in some instances, government-sponsored enterprise securities may benefit from indirect support. Freddie Mac and Fannie Mae are examples of government-sponsored enterprise securities. On September 6, 2008, the Federal Housing Finance Authority (“FHFA”), an agency of the U.S. government, placed Fannie Mae and Freddie Mac into conservatorship under its authority with the stated purpose to preserve and conserve each entity’s assets and property, and to put each entity in a sound and solvent condition. The effect that this conservatorship will have on these entities’ debt and equities is unclear and no assurance can be given that any steps taken by the FHFA or the U.S. Treasury or any other agency of the U.S. government with respect to Fannie Mae or Freddie Mac will succeed. Fannie Mae and Freddie Mac have each been and remain the subject of investigations by federal regulators over certain accounting matters. Such investigations, and any resulting restatements, may adversely affect these entities and, as a result, the payment of principal or interest on securities they issue.

Risks Associated with Investing in U.S. Government Securities

The U.S. government is considered to be the best credit-rated issuer in the debt markets. Since Treasury securities are direct obligations of the U.S. government, there is minimal credit risk. While most

other government-sponsored securities are not direct obligations of the U.S. government (although some are guaranteed by the U.S. government), they also offer little credit risk.

However, another type of risk that may affect the Fund is market and/or interest rate risk. For example, debt securities with longer maturities tend to produce higher yields and are generally subject to potentially greater capital appreciation and depreciation than obligations with shorter maturities and lower yields. The market value of U.S. government securities generally varies inversely with changes in market interest rates. An increase in interest rates, therefore, would generally reduce the market value of any U.S. government security held by the Fund, while a decline in interest rates would generally increase the market value of such investment.

Asset-Backed Securities

Asset-backed securities include pools of mortgages, loans, receivables or other assets. Payment of principal and interest may be largely dependent upon the cash flows generated by the assets backing the securities, and, in certain cases, supported by letters of credit, surety bonds, or other credit enhancements. The value of asset-backed securities may also be affected by the creditworthiness of the servicing agent for the pool, the originator of the loans or receivables, or the financial institution(s) providing the credit support.

Mortgage-Backed Securities

The Fund may invest in securities that directly or indirectly represent participations in, or are collateralized by, payable from, mortgage loans secured by real property (“Mortgage-Backed Securities”).

Mortgage-Backed Securities represent pools of mortgage loans assembled for sale to investors by various governmental agencies such as the Government National Mortgage Association (“Ginnie Mae”) and government-related organizations such as Fannie Mae and Freddie Mac, as well as by nongovernmental issuers such as commercial banks, savings and loan institutions, mortgage bankers, and private mortgage insurance companies. Although certain Mortgage-Backed Securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. If the Advisor purchases a Mortgage-Backed Security at a premium, that portion may be lost if there is a decline in the market value of the security whether resulting from changes in interest rates or prepayments in the underlying mortgage collateral. As with other interest-bearing securities, the prices of such securities are inversely affected by changes in interest rates. However, though the value of a Mortgage-Backed Security may decline when interest rates rise, the converse is not necessarily true since in periods of declining interest rates the mortgages underlying the securities are prone to prepayment. For this and other reasons, a Mortgage-Backed Security’s stated maturity may be shortened by unscheduled prepayments on the underlying mortgages and, therefore, it is not possible to predict accurately the securities’ return to the Fund. In addition, regular payments received in respect of Mortgage-Backed Securities include both interest and principal. No assurance can be given as to the return the Fund will receive when these amounts are reinvested.

There are a number of important differences among the agencies and instrumentalities of the U.S. government that issue Mortgage-Backed Securities and among the securities that they issue. Mortgage-Backed Securities issued by Ginnie Mae include Ginnie Mae Mortgage Pass-Through Certificates which are guaranteed as to the timely payment of principal and interest by Ginnie Mae. This guarantee is backed by the full faith and credit of the United States. Ginnie Mae is a wholly-owned U.S. government Corporation within the Department of Housing and Urban Development. Ginnie Mae certificates also are supported by the authority of Ginnie Mae to borrow funds from the U.S. Treasury to make payments under its guarantee. Mortgage-Backed Securities issued by Fannie Mae include Fannie Mae Guaranteed Mortgage Pass-Through Certificates (also known as “Fannie Maes”) which are guaranteed as to timely payment of the principal and interest by Fannie Mae. Fannie Maes are solely the

obligations of Fannie Mae and are not backed by or entitled to the full faith and credit of the United States. Fannie Mae is a government sponsored organization. Mortgage-Backed Securities issued by Freddie Mac include Freddie Mac Mortgage Participation Certificates (also known as “Freddie Mac PCs”). Freddie Macs are solely the obligations of Freddie Mac and are not backed by or entitled to the full faith and credit of the United States.

In 2008, Freddie Mac and Fannie Mae were placed into conservatorship by their new regulator, the Federal Housing Finance Agency (“FHFA”). Simultaneously, the U.S. Treasury made a commitment of indefinite duration to maintain the positive net worth of both firms. As conservator, the FHFA has the authority to repudiate any contract either firm has entered into prior to the FHFA’s appointment as conservator (or receiver should either firm go into default) if the FHFA, in its sole discretion determines that performance of the contract is burdensome and repudiation would promote the orderly administration of Fannie Mae’s or Freddie Mac’s affairs. While the FHFA has indicated that it does not intend to repudiate the guaranty obligations of either entity, doing so could adversely affect holders of their mortgage-backed securities. For example, if a contract were repudiated, the liability for any direct compensatory damages would accrue to the entity’s conservatorship estate and could only be satisfied to the extent the estate had available assets. As a result, if interest payments on Fannie Mae or Freddie Mac mortgage-backed securities held by the fund were reduced because underlying borrowers failed to make payments or such payments were not advanced by a loan servicer, the fund’s only recourse might be against the conservatorship estate, which might not have sufficient assets to offset any shortfalls.

The FHFA, in its capacity as conservator, has the power to transfer or sell any asset or liability of Fannie Mae or Freddie Mac. The FHFA has indicated it has no current intention to do this; however, should it do so a holder of a Fannie Mae or Freddie Mac mortgage-backed security would have to rely on another party for satisfaction of the guaranty obligations and would be exposed to the credit risk of that party.

Certain rights provided to holders of mortgage-backed securities issued by Fannie Mae or Freddie Mac under their operative documents may not be enforceable against the FHFA, or enforcement may be delayed during the course of the conservatorship or any future receivership. For example, the operative documents may provide that upon the occurrence of an event of default by Fannie Mae or Freddie Mac, holders of a requisite percentage of the mortgage-backed security may replace the entity as trustee. However, under the Federal Housing Finance Regulatory Reform Act of 2008, holders may not enforce this right if the event of default arises solely because a conservator or receiver has been appointed.

The Fund may also invest in Mortgage-Backed Securities which are collateralized mortgage obligations structured on pools of mortgage pass-through certificates or mortgage loans (“CFOs” and “REMICs”) and derivative multiple-class mortgage-backed securities (“Stripped Mortgage-Backed Securities” or “SMBSs”).

Recently, rating agencies have placed on credit watch or downgraded the ratings previously assigned to a large number of mortgage-related securities (which may include certain of the mortgage-related securities in which the Fund may in the future invest), and may continue to do so in the future. If a mortgage-related security in which the Fund is invested is placed on credit watch or downgraded, the value of the security may decline and the Fund may experience losses.

Further, the recent and unprecedented disruption in the residential mortgage-related securities market (and in particular, the “subprime” residential mortgage market), the broader mortgage-related securities market and the asset-backed securities market have resulted in downward price pressures and increasing foreclosures and defaults in residential and commercial real estate. Concerns over inflation, energy costs, geopolitical issues, the availability and cost of credit, the mortgage market and a declining real estate market have contributed to increased volatility and diminished expectations for the economy and markets going forward, and have contributed to dramatic declines in the housing market, with falling home prices and increasing foreclosures and unemployment, and significant asset write-downs by

financial institutions. The continuation or worsening of this general economic downturn may lead to further declines in income from, or the value of, real estate, including the real estate which secures the mortgage-related securities held by the Fund. Additionally, a lack of credit liquidity and decreases in the value of real property have occurred and may continue to occur or worsen, and potentially prevent borrowers from refinancing their mortgages, which may increase the likelihood of default on their mortgage loans.

These economic conditions may also adversely affect the amount of proceeds the holder of a mortgage loan or mortgage-related securities would realize in the event of a foreclosure or other exercise of remedies. Moreover, even if such mortgage-related securities are performing as anticipated, their value in the secondary market may fall or continue to fall as a result of deterioration in general market conditions for such securities or other asset-backed or structured products. Trading activity associated with market indices may also drive spreads on those indices wider than spreads on mortgage-related securities, thereby resulting in a decrease in the value of such mortgage-related securities. Mortgage loans backing non-agency mortgage-related securities are more sensitive to economic factors that could affect the ability of borrowers to pay their obligations under the mortgage loans backing these securities. These economic conditions may reduce the cash flow that the Fund investing in such mortgage-related securities receives from such securities and increase the incidence and severity of credit events and losses in respect of such securities. In addition, interest rate spreads for mortgage-backed securities have widened and are more volatile when compared to the recent past due to these adverse changes in market conditions. In the event that interest rate spreads for mortgage-related securities continue to widen following the purchase of such assets by the Fund, the market value of such securities is likely to decline and, in the case of a substantial spread widening, could decline by a substantial amount. Furthermore, these adverse changes in market conditions have resulted in a severe liquidity crisis in the market for mortgage-backed securities (including the mortgage-related securities in which certain of the Fund may invest) and increasing unwillingness by banks, financial institutions and investors to extend credit to servicers, originators and other participants in the mortgage-related securities market for these securities and other asset-backed securities. As a result, the liquidity and/or the market value of any mortgage-related securities that are owned by the Fund may experience further declines after they are purchased by the Fund. The recent rise in the rate of foreclosures of properties has resulted in legislative, regulatory and enforcement actions seeking to prevent or restrict foreclosures. Actions have also been brought against issuers and underwriters of residential mortgage-backed securities collateralized by such residential mortgage loans and investors in such residential mortgage-backed securities. Future legislative or regulatory initiatives by federal, state or local legislative bodies or administrative agencies, if enacted or adopted, could delay foreclosure or the exercise of other remedies, provide new defenses to foreclosure, or otherwise impair the ability of the loan servicer to foreclose or realize on a defaulted residential mortgage loan included in a pool of residential mortgage loans backing such residential mortgage-backed securities. The nature or extent of any future limitations on foreclosure or exercise of other remedies that may be enacted is uncertain. Governmental actions that interfere with the foreclosure process, for example, could increase the costs of such foreclosures or exercise of other remedies, delay the timing or reduce the amount of recoveries on defaulted residential mortgage loans and securities backed by such residential mortgage loans owned by the Fund, and could adversely affect the yields on the mortgage-related securities owned by the Fund and could have the effect of reducing returns to the Fund that has invested in mortgage-related securities collateralized by these residential mortgage loans.

Structured Securities

Structured securities employ a trust or other similar structure to modify the maturity, price characteristics or quality of financial assets. For example, structural features can be used to modify the maturity of a security or interest rate adjustment features can be used to enhance price stability. If the structure does not perform as intended, adverse tax or investment consequences may result. Neither the Internal Revenue Service (“IRS”) nor any other regulatory authority has ruled definitively on certain legal

issues presented by structured securities. Future tax or other regulatory determinations could adversely affect the value, liquidity or tax treatment of the income received from these securities or the nature and timing of distributions made by the Fund. The payment of principal and interest on structured securities may be largely dependent on the cash flows generated by the underlying financial assets.

Variable or Floating Rate Securities

Variable or floating rate securities provide for periodic adjustments of the interest rate paid. Variable rate securities provide for a specific periodic adjustment in the interest rate, while floating rate securities have interest rates that change whenever there is a change in a designated benchmark rate. Some variable or floating rate securities have put features.

Indexed Securities

The Fund may purchase securities whose prices are indexed to the prices of other securities, securities indices, currencies, precious metals or other commodities, or other financial indicators. Indexed securities typically, but not always, are debt securities or deposits whose value at maturity or coupon rate is determined by reference to a specific instrument or statistic. Gold-indexed securities, for example, typically provide for a maturity value that depends on the price of gold, resulting in a security whose price tends to rise and fall together with gold prices. Currency-indexed securities typically are short-term to intermediate-term debt securities whose maturity values or interest rates are determined by reference to the values of one or more specified foreign currencies, and may offer higher yields than U.S. dollar-denominated securities of equivalent issuers. Currency-indexed securities may be positively or negatively indexed; that is, their maturity value may increase when the specified currency value increases, resulting in a security that performs similarly to a foreign-denominated instrument, or their maturity value may decline when foreign currencies increase, resulting in a security whose price characteristics are similar to a put on the underlying currency. Currency-indexed securities may also have prices that depend on the value of a number of different foreign currencies relative to each other.

The performance of indexed securities depends to a great extent on the performance of the security, currency, or other instrument to which they are indexed, and may also be influenced by interest rate changes in the United States and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates. Recent issuers of indexed securities have included banks, corporations, and certain U.S. government agencies. Indexed securities may be more volatile than the underlying instruments.

Stripped Securities

The Fund may purchase separately traded interest and principal component parts of such obligations that are transferable through the Federal book entry system, known as Separately Traded Registered Interest and Principal Securities ("STRIPS") and Coupon Under Book Entry Safekeeping ("CUBES"). These instruments are issued by banks and brokerage firms and are created by depositing U.S. Treasury notes and U.S. Treasury bonds into a special account at a custodian bank; the custodian holds the interest and principal payments for the benefit of the registered owner of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. Receipts include Treasury Receipts ("TRs"), Treasury Investment Growth Receipts ("TIGRs") and Certificates of Accrual on Treasury Securities ("CATS").

STRIPS, CUBES, TRs, TIGRs and CATS are sold as zero coupon securities, which mean that they are sold at a substantial discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. This discount is amortized over the life of the security, and such amortization will constitute the income earned on the security for both accounting and tax purposes.

Because of these features, these securities may be subject to greater interest rate volatility than interest-paying U.S. Treasury obligations. Bonds issued by the Resolution Funding Corporation (“REFCORP”) can also be stripped in this fashion. REFCORP Strips are eligible investments for the Fund.

Zero Coupon Bonds

The Fund may purchase zero coupon bonds. Zero coupon bonds are purchased at a discount from the face amount because the buyer receives only the right to receive a fixed payment on a certain date in the future and does not receive any periodic interest payments. The effect of owning instruments which do not make current interest payments is that a fixed yield is earned not only on the original investment but also, in effect, on all discount accretion during the life of the obligations. This implicit reinvestment of earnings at the same rate eliminates the risk of being unable to reinvest distributions at a rate as high as the implicit yields on the zero coupon bond, but at the same time eliminates the holder’s ability to reinvest at higher rates in the future. For this reason, zero coupon bonds are subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities which pay interest currently, whose fluctuation increases the longer the period of maturity. Although zero coupon bonds do not pay interest to holders prior to maturity, U.S. federal income tax law requires the Fund to recognize as interest income a portion of the bond’s discount each year and this income must then be distributed to shareholders along with other income earned by the Fund. To the extent that any shareholders in the Fund elect to receive their dividends in cash rather than reinvest such dividends in additional shares, cash to make these distributions will have to be provided from the assets of the Fund or other sources such as proceeds of sales of Fund shares and/or sales of portfolio securities. In such cases, the Fund will not be able to purchase additional income producing securities with cash used to make such distributions and its current income may ultimately be reduced as a result.

Lower-Rated Debt Securities

The Fund may purchase lower-rated debt securities, commonly referred to as “junk bonds” (those rated below the fourth highest grade by NRSRO) and non-rated securities judged by the Advisor to be of equivalent quality), that have poor protection with respect to the payment of interest and repayment of principal, or that may be in default. These securities are often considered to be speculative and involve greater risk of loss or price changes due to changes in the issuer’s capacity to pay. The market prices of lower-rated debt securities may fluctuate more than those of higher-rated debt securities and may decline significantly in periods of general economic difficulty, which may follow periods of rising interest rates.

The market for lower-rated debt securities may be thinner and less active than that for higher-rated debt securities, which can adversely affect the prices at which the former are sold. If market quotations are not available, lower-rated debt securities will be valued in accordance with procedures established by the Board, including the use of outside pricing services. Judgment plays a greater role in valuing high-yield corporate debt securities than is the case for securities for which more external sources for quotations and last-sale information are available. Adverse publicity and changing investor perceptions may affect the ability of outside pricing services to value lower-rated debt securities and the Fund’s ability to sell these securities.

Since the risk of default is higher for lower-rated debt securities, the Advisor’s research and credit analysis are an especially important part of managing securities of this type held by the Fund. In considering investments for the Fund, the Advisor will attempt to identify those issuers of high-yielding debt securities whose financial condition are adequate to meet future obligations, have improved, or is expected to improve in the future. The analysis focuses on relative values based on such factors as interest or dividend coverage, asset coverage, earnings prospects, and the experience and managerial strength of the issuer.

The Fund may choose, at its expense or in conjunction with others, to pursue litigation or otherwise exercise its right as security holder to seek to protect the interests of security holders if it determines this to be in the best interest of the Fund's shareholders.

Loans and Other Debt Instruments

Loans and other direct debt instruments are interests in amounts owed by a corporate, governmental, or other borrower to another party. They may represent amounts owed to lenders or lending syndicates (loans and loan participation), to suppliers of goods or services (trade claims or other receivables), or to other parties. Direct debt instruments involve a risk of loss in case of default or insolvency of the borrower and may offer less legal protection to the Fund in the event of fraud or misrepresentation. In addition, loan participations involve a risk of insolvency of the lending bank or other financial intermediary. Direct debt instruments may also include standby financing commitments that obligate the Fund to supply additional cash to the borrower on demand.

Real Estate-Related Investments

Real estate-related instruments include real estate investment trusts, commercial and residential mortgage-backed securities, and real estate financings. Real estate-related instruments are sensitive to factors such as real estate values, property taxes, interest rates, cash flow of underlying real estate assets, overbuilding, and the management skill and creditworthiness of the issuer. Real estate-related instruments may also be affected by tax and regulatory requirements, such as those relating to the environment.

Repurchase Agreements

The Fund may enter into repurchase agreements with respect to its portfolio securities. Pursuant to such agreements, the Fund acquires securities from financial institutions such as banks and broker-dealers as are deemed to be creditworthy by the Advisor, subject to the seller's agreement to repurchase and the Fund's agreement to resell such securities at a mutually agreed upon date and price. The repurchase price generally equals the price paid by the Fund plus interest negotiated on the basis of current short-term rates (which may be more or less than the rate on the underlying portfolio security). The seller under a repurchase agreement will be required to maintain the value of the underlying securities at not less than 102% of the repurchase price under the agreement. If the seller defaults on its repurchase obligation, the Fund will suffer a loss to the extent that the proceeds from a sale of the underlying securities are less than the repurchase price under the agreement. Bankruptcy or insolvency of such a defaulting seller may cause the Fund's rights with respect to such securities to be delayed or limited. Repurchase agreements are considered to be loans under the 1940 Act.

Reverse Repurchase Agreements

The Fund reserves the right to borrow funds for temporary purposes by entering into reverse repurchase agreements in accordance with the Fund's investment restrictions. Pursuant to such agreements, the Fund would sell portfolio securities to financial institutions such as banks and broker-dealers, and agree to repurchase the securities at the mutually agreed-upon date and price. The Fund would enter into reverse repurchase agreements only to avoid otherwise selling securities during unfavorable market conditions to meet redemptions. When the Fund enters into a reverse repurchase agreement, it will place in a segregated custodial account assets consistent with the Fund's investment restrictions having a value equal to the repurchase price (including accrued interest), and will subsequently monitor the account to ensure that such equivalent value is maintained. Such assets will include U.S. Government securities or other liquid, high-grade debt securities. Reverse repurchase agreements are not considered to be borrowings for the purpose of the Fund's limitation on borrowing when assets have been appropriately segregated as described in the prior two sentences.

The use of reverse repurchase agreements by the Fund creates leverage which increases the Fund's investment risk. If the income and gains on securities purchased with the proceeds of reverse repurchase agreements exceed the cost of the agreements, the Fund's earnings or net asset value will increase faster than otherwise would be the case. Conversely, if the income and gains fail to exceed the costs, earnings or net asset value would decline faster than otherwise would be the case. The Fund will seek to enter reverse repurchase agreements only when the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction. Reverse repurchase agreements involve the risk that the market value of the securities sold by the Fund may decline below the price at which the Fund is obligated to repurchase the securities.

Borrowing

The Fund may borrow money for investment purposes. The Fund's Investment Restriction regarding borrowing will be interpreted to permit the Fund to engage in trading practices and investments that may be considered to be borrowing to the extent permitted by the 1940 Act.

The Fund may borrow money in amounts of up to one-third of its total assets (including the amount borrowed) from banks. In addition, the Fund is authorized to borrow up to 5% of its total assets for temporary, extraordinary or emergency purposes or for clearance of transactions. To limit the risks attendant to borrowing, the 1940 Act requires the Fund to maintain at all times an "asset coverage" of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the Fund's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Borrowing money to increase the Fund's investment portfolio is known as "leveraging." Borrowing, especially when used for leverage, may cause the value of the Fund's shares to be more volatile than if the Fund did not borrow. This is because borrowing tends to magnify the effect of any increase or decrease in the value of the Fund's portfolio holdings. Borrowed money thus creates an opportunity for greater gains, but also greater losses. To repay borrowings, the Fund may have to sell securities at a time and at a price that is unfavorable to the Fund. There also are costs associated with borrowing money, and these costs would offset and could eliminate the Fund's net investment income in any given period.

The use of borrowing by the Fund involves special risk considerations that may not be associated with other funds having similar objectives and policies.

Since substantially all of the Fund's assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of the Fund's agreement with its lender, the net asset value per share of the Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if the Fund did not borrow funds. In addition, interest costs on borrowings may fluctuate with changing market

rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales. The Fund will reduce its borrowing amount within three days, if its asset coverage falls below the amount required by the 1940 Act.

Issuance of Senior Securities

Generally, issuing senior securities is prohibited under the 1940 Act; however, certain exceptions apply such as in the case of borrowing and certain other leveraging transactions. With respect to the Fund's fundamental investment restriction relating to issuing senior securities, "senior securities" are defined as fund obligations that have a priority over the Fund's shares with respect to the payment of dividends or the distribution of fund assets. The 1940 Act prohibits the Fund from issuing senior securities except that the Fund may borrow money in amounts of up to one-third of the Fund's total assets from banks for any purpose as discussed above. The Fund also may borrow up to 5% of the Fund's total assets from banks or other lenders for temporary purposes, and these borrowings are not considered senior securities. The issuance of senior securities by the Fund can increase the speculative character of the Fund's outstanding shares through leveraging. Leveraging of the Fund's portfolio through the issuance of senior securities magnifies the potential for gain or loss on monies, because even though the Fund's net assets remain the same, the total risk to investors is increased. Certain widely used investment practices that involve a commitment by the Fund to deliver money or securities in the future are not considered by the SEC to be senior securities, provided that the Fund segregates cash or liquid securities in an amount necessary to pay the obligation or the Fund holds an offsetting commitment from another party. These investment practices include repurchase and reverse repurchase agreements, swaps, dollar rolls, options, futures and forward contracts. The Fund's policy will be interpreted not to prevent collateral arrangements with respect to swaps, options, forward or futures contracts or other derivatives, or the posting of initial or variation margin.

Options, Futures and Other Strategies

General

The Fund may invest in options on equities, debt and stock indices (collectively, "options"). The Fund may also invest in futures contracts and options on futures contracts (collectively, "futures"). The Fund may make these investments as a substitute for a comparable market position in the underlying security, to attempt to hedge or limit the exposure of the Fund's position, to create a synthetic money market position for certain tax-related purposes and to effect closing transactions. The Fund will not invest in futures for speculative purposes.

The use of futures and options (collectively, "Financial Instruments") is subject to applicable regulations of the SEC, the several exchanges upon which they are traded and the Commodity Futures Trading Commission. In addition, the Fund's ability to use Financial Instruments will be limited by tax considerations. See "Distributions and Tax Information."

In addition to the instruments, strategies and risks described below and in the Prospectus, the Advisor may discover additional opportunities in connection with Financial Instruments and other similar or related techniques. These new opportunities may become available as the Advisor develops new techniques, as regulatory authorities broaden the range of permitted transactions and as new Financial Instruments or other techniques are developed. The Advisor may utilize these opportunities to the extent that they are consistent with the Fund's investment objectives and permitted by the Fund's investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below or in the Prospectus.

The use of Financial Instruments involves special considerations and risks which include, but are not limited to, the following:

- (1) Successful use of most Financial Instruments depends upon the Advisor's ability to predict movements of the overall securities markets, which requires different skills than predicting changes in the prices of individual securities. The ordinary spreads between prices in the cash and futures markets, due to the differences in the natures of those markets, are subject to distortion. Due to the possibility of distortion, a correct forecast of stock market trends by the Advisor may still not result in a successful transaction. The Advisor may be incorrect in its expectations as to the extent of market movements or the time span within which the movements take place, which, thus, may result in the strategy being unsuccessful.
- (2) Options and futures prices can diverge from the prices of their underlying instruments. Options and futures prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract, which may not affect security prices the same way. Imperfect or no correlation also may result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, and from imposition of daily price fluctuation limits or trading halts.
- (3) As described below, the Fund might be required to maintain assets as "cover," maintain segregated accounts or make margin payments when it takes positions in Financial Instruments involving obligations to third parties (*e.g.*, Financial Instruments other than purchased options). If the Fund were unable to close out its positions in such Financial Instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expired or matured. These requirements might impair the Fund's ability to sell a portfolio security or make an investment when it would otherwise be favorable to do so or require that the Fund sell a portfolio security at a disadvantageous time. The Fund's ability to close out a position in a Financial Instrument prior to expiration or maturity depends on the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the other party to the transaction (the "counter-party") to enter into a transaction closing out the position. Therefore, there is no assurance that any position can be closed out at a time and price that is favorable to the Fund.

The Fund will not enter into any transactions using Financial Instruments (except for purchased options) unless it owns either (1) an offsetting ("covered") position in securities or other options or futures contracts or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. The Fund will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with its custodian in the prescribed amount as determined daily.

Assets used as cover or held in an account cannot be sold while the position in the corresponding Financial Instrument is open, unless they are replaced with other appropriate assets. As a result, the commitment of a large portion of the Fund's assets to cover or held in accounts could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

- (4) Losses may arise due to unanticipated market price movements, lack of a liquid secondary market for any particular instrument at a particular time or due to losses from premiums paid by the Fund on options transactions.

Options on Securities and Securities Indices

The Fund normally will purchase call options in anticipation of an increase in the market value of securities of the type in which it may invest or a positive change in the currency in which such securities are denominated. The purchase of a call option would entitle the Fund, in return for the premium paid, to purchase specified securities or a specified amount of a foreign currency at a specified price during the option period. The Fund normally will purchase put options in anticipation of a decrease in the market value of securities of the type in which it may invest or a negative change in the currency in which such securities are denominated. The purchase of a put option would entitle the Fund, in return for the premium paid, to sell specified securities or a specified amount of a foreign currency at a specified price during the option period.

The Fund may purchase and sell options traded on U.S. and foreign exchanges based on the market value of the options. Although the Fund will generally purchase only those options for which there appears to be an active secondary market, there can be no assurance that a liquid secondary market on an exchange will exist for any particular option or at any particular time. For some options, no secondary market on an exchange may exist. In such event, it might not be possible to effect closing transactions in particular options, with the result that the Fund would have to exercise its options in order to realize any profit and would incur transaction costs upon the purchase or sale of the underlying securities.

Secondary markets on an exchange may not exist or may not be liquid for a variety of reasons including: (i) insufficient trading interest in certain options; (ii) restrictions on opening transactions or closing transactions imposed by an exchange; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances which interrupt normal operations on an exchange; (v) inadequate facilities of an exchange or the Options Clearing Corporation to handle current trading volume at all times; or (vi) discontinuance in the future by one or more exchanges for economic or other reasons, of trading of options (or of a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options on that exchange that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

The Fund may write (*i.e.*, sell) covered put and call options on securities, securities indices and currencies in which it may invest. A covered call option involves the Fund's giving another party, in return for a premium, the right to buy specified securities owned by the Fund at a specified future date and price set at the time of the contract. A covered call option serves as a partial hedge against a price decline of the underlying security. However, by writing a covered call option, the Fund gives up the opportunity, while the option is in effect, to realize gain from any price increase (above the option exercise price) in the underlying security. In addition, the Fund's ability to sell the underlying security is limited while the option is in effect unless the Fund effects a closing purchase transaction.

The Fund may also write covered put options that give the holder of the option the right to sell the underlying security to the Fund at the stated exercise price. The Fund will receive a premium for writing a put option, but will be obligated for as long as the option is outstanding to purchase the underlying security at a price that may be higher than the market value of that security at the time of exercise. In order to "cover" put options it has written, the Fund will cause its custodian to segregate cash, cash equivalents, U.S. government securities or other liquid equity or debt securities with at least the value of the exercise price of the put options.

There is no assurance that higher than anticipated trading activity or other unforeseen events might not, at times, render certain of the facilities of the Options Clearing Corporation inadequate, and

result in the institution by an exchange of special procedures that may interfere with the timely execution of the Fund's option orders.

Futures and Options on Futures

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific security or currency at a specified future time at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out prior to delivery by offsetting purchases or sales of matching futures contracts (contracts traded on the same exchange, on the same underlying security or index, and with the same delivery month). If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain; if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain; if it is less, the Fund realizes a capital loss. The transaction costs must also be included in these calculations. The Fund may use futures contracts and related options for bona fide hedging purposes, such as to offset changes in the value of securities held or expected to be acquired or be disposed of or to minimize fluctuations in foreign currencies. The Fund will minimize the risk that it will be unable to close out a futures contract by only entering into futures contracts that are traded on national futures exchanges.

An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made; generally contracts are closed out prior to their expiration date.

In order to avoid leveraging and related risks, when the Fund invests in futures contracts, the Fund will cover positions by depositing an amount of cash or liquid securities equal to the market value of the futures positions held, less margin deposits, in a segregated account and that amount will be marked-to-market on a daily basis.

There are risks associated with these activities, including the following: (1) the success of a hedging strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect or lack of correlation between the changes in market value of the securities held and the prices of futures and options on futures; (3) there may not be a liquid secondary market for a futures contract or option; (4) trading restrictions or limitations may be imposed by an exchange; and (5) government regulations may restrict trading in futures contracts and options on futures.

The Fund may buy and sell futures contracts and related options to manage exposure to changing interest rates and securities prices. Some strategies reduce the Fund's exposure to price fluctuations, while others tend to increase market exposure. Futures and options on futures can be volatile instruments and involve certain risks that could negatively impact the Fund's return. No price is paid upon entering into futures contracts. Instead, the Fund would be required to deposit an amount of cash or U.S. Treasury securities known as "initial margin." Subsequent payments, called "variation margin," to and from the broker, would be made on a daily basis as the value of the future position varies (a process known as "marked to market"). The margin is in the nature of performance bond or good-faith deposit on a futures contract. Futures and options on futures are taxable instruments.

Exclusion from Definition of Commodity Pool Operator

Pursuant to amendments by the Commodity Futures Trading Commission to Rule 4.5 under the Commodity Exchange Act (“CEA”), the Advisor has filed a notice of exemption from registration as a “commodity pool operator” with respect to the Fund. The Fund and the Advisor are therefore not subject to registration or regulation as a pool operator under the CEA. In order to claim the Rule 4.5 exemption, the Fund is significantly limited in its ability to invest in commodity futures, options and swaps (including securities futures, broad-based stock index futures and financial futures contracts).

Short-Term Investments

The Fund may invest in any of the following securities and instruments:

Certificates of Deposit, Bankers’ Acceptances and Time Deposits

The Fund may hold certificates of deposit, bankers’ acceptances and time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers’ acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are “accepted” by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers’ acceptances acquired by the Fund will be dollar-denominated obligations of domestic banks, savings and loan associations or financial institutions which, at the time of purchase, have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. government.

In addition to buying certificates of deposit and bankers’ acceptances, the Fund also may make interest-bearing time or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Commercial Paper and Short-Term Notes

The Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short-term notes will consist of issues rated at the time of purchase “A-2” or higher by Standard & Poor’s Ratings Group, “Prime-1” or “Prime-2” by Moody’s Investors Service, Inc., or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by the Advisor to be of comparable quality. These rating symbols are described in Appendix B.

INVESTMENT RESTRICTIONS

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the affirmative vote of the holders of a “majority” of the outstanding voting securities of the Fund. Under the 1940 Act, the “vote of the holders of a majority of the outstanding voting securities” means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of the Fund’s outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund.

As a matter of fundamental policy:

As a matter of fundamental policy, the Fund may not:

1. With respect to 75% of its total assets, purchase securities issued by any one issuer (other than cash, cash items, or securities issued or guaranteed by the government of the United States or its agencies or instrumentalities) if, as a result at the time of such purchase, more than 5% of the value of its total assets would be invested in the securities of that issuer, or if it would own more than 10% of the outstanding voting securities of that issuer.
2. Borrow money or issue senior securities, except through reverse repurchase agreements or otherwise as permitted under the 1940 Act, as interpreted, modified or otherwise permitted by regulatory authority. Generally, issuing senior securities is prohibited under the 1940 Act; however, certain exceptions apply such as in the case of reverse repurchase agreements, borrowing, and certain other leveraging transactions;
3. Act as underwriter (except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio);
4. Invest 25% or more of its net assets, calculated at the time of purchase and taken at market value, in securities of issuers in any one industry or groups of industries (other than U.S. government securities);
5. Purchase or sell real estate, unless acquired as a result of ownership of securities (although the Fund may purchase and sell securities that are secured by real estate and securities of companies that invest or deal in real estate);
6. Purchase or sell physical commodities, unless acquired as a result of ownership of securities or other instruments. This limitation shall not prevent the Fund from purchasing, selling, or entering into futures contracts, or acquiring securities or other instruments and options thereon backed by, or related to, physical commodities; or
7. Make loans (except purchases of debt securities consistent with the investment policies of the Fund). For purposes of this limitation, entering into repurchase agreements, lending securities and acquiring any debt security are not deemed to be the making of loans.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in the percentage or rating resulting from any cause other than actions by the Fund will not be considered a violation of the Fund's investment restrictions. If the value of the Fund's holdings of illiquid securities at any time exceeds the percentage limitation applicable due to subsequent fluctuations in value or other reasons, the Board will consider what actions, if any, are appropriate to maintain adequate liquidity.

PORTFOLIO TURNOVER

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Advisor, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. See "Execution of Portfolio Transactions."

The Fund had the following portfolio turnover rate for the fiscal years ended October 31:

Portfolio Turnover	2016	2017
Otter Creek Long Short Opportunity Fund	80%*	134%

*Turnover of the Fund may fluctuate from year to year. The typical holding period for long positions in the Fund may be approximately one to three years while short positions may be in the Fund for six to eighteen months. The timing of transactions and the development of the Advisor's investment thesis may impact the turnover of the Fund.

PORTFOLIO HOLDINGS INFORMATION

The Trust, on behalf of the Fund, has adopted a portfolio holdings disclosure policy that governs the timing and circumstances of disclosure of portfolio holdings of the Fund. The Advisor has also adopted a policy with respect to disclosure of portfolio holdings of the Fund (the "Advisor's Policy"). Information about the Fund's portfolio holdings will not be distributed to any third party except in accordance with the portfolio holdings policies and the Advisor's Policy (the "Disclosure Policies"). The Advisor and the Board considered the circumstances under which the Fund's portfolio holdings may be disclosed under the Disclosure Policies and the actual and potential material conflicts that could arise in such circumstances between the interests of the Fund's shareholders and the interests of the Advisor, distributor or any other affiliated person of the Fund, its Advisor or its distributor. After due consideration, the Advisor and the Board determined that the Fund has a legitimate business purpose for disclosing portfolio holdings to persons described in the Disclosure Policies, including mutual fund rating or statistical agencies, or persons performing similar functions, and internal parties involved in the investment process, administration or custody of the Fund. Pursuant to the Disclosure Policies, the Trust's Chief Compliance Officer ("CCO"), President and Treasurer are each authorized to consider and authorize dissemination of portfolio holdings information to additional third parties, after considering the best interests of the Fund's shareholders and potential conflicts of interest in making such disclosures.

The Board exercises continuing oversight of the disclosure of the Fund's portfolio holdings by (1) overseeing the implementation and enforcement of the Disclosure Policies, Codes of Ethics and other relevant policies of the Fund and its service providers by the Trust's CCO, (2) by considering reports and recommendations by the Trust's CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) by considering to approve any amendment to the Disclosure Policies. The Board reserves the right to amend the Disclosure Policies at any time without prior notice to shareholders in its sole discretion.

Disclosure of the Fund's complete holdings is required to be made after the periods covered by the Fund's Annual Report and Semi-Annual Report to Fund shareholders and in the quarterly holdings report on Form N-Q. These reports are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov. The Fund discloses its complete fiscal quarter-end portfolio holdings on their website at www.ottercreekfunds.com within 60 days after the fiscal quarter-end. The fiscal quarter-end

portfolio holdings for the Fund will remain posted on the website until updated by required regulatory filings with the SEC. Portfolio holdings information posted on the Fund's website may be separately provided to any person, commencing on the day after it is first published on the Fund's website. In addition, the Fund may provide its complete portfolio holdings at the same time that it is filed with the SEC.

In the event of a conflict between the interests of the Fund and the interests of the Advisor or an affiliated person of the Advisor, the CCO of the Advisor, in consultation with the Trust's CCO, shall make a determination in the best interests of the Fund, and shall report such determination to the Board at the end of the quarter in which such determination was made. Any employee of the Advisor who suspects a breach of this obligation must report the matter immediately to the Advisor's CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without lag as part of the normal investment activities of the Fund to each of the following entities, which, by explicit agreement or by virtue of their respective duties to the Fund, are required to maintain the confidentiality of the information disclosed, including a duty not to trade on non-public information: the fund administrator, fund accountant, custodian, transfer agent, auditors, counsel to the Fund or the Board, broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities) and regulatory authorities. Portfolio holdings information not publicly available with the SEC or through the Fund's website may only be provided to additional third parties, including mutual fund ratings or statistical agencies, in accordance with the Disclosure Policies, when the Fund has a legitimate business purpose and the third party recipient is subject to a confidentiality agreement that includes a duty not to trade on non-public information.

In no event shall the Advisor, its affiliates or employees, the Fund, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

There can be no assurance that the Disclosure Policies will protect the Fund from potential misuse of portfolio holdings information by individuals or entities to which it is disclosed.

On a monthly basis by the seventh business day, the Advisor will disclose at a minimum the top ten holdings as a percentage of net assets along with any potential changes to the holdings which they may choose to highlight as part of their factsheet commentary about the portfolio. Other portfolio information may be highlighted as part of their quarterly investor webcasts which will be posted to the website after the call. From time to time, the Advisor may also make additional disclosure of the Fund's portfolio holdings on the Fund's website. Shareholders can access the Fund's website at www.ottercreekfunds.com for additional information about the Fund, including, without limitation, the periodic disclosure of their portfolio holdings.

TRUSTEES AND EXECUTIVE OFFICERS

The Board is responsible for the overall management of the Trust, including general supervision and review of the investment activities of the Fund. The Board, in turn, elects the officers of the Trust, who are responsible for the day-to-day operations of the Trust and its separate series. The current Trustees and executive officers of the Trust, their birth dates, positions with the Trust, terms of office with the Trust and length of time served, their principal occupations during the past five years and other directorships are set forth in the table below.

Name, Address and Age	Positions with the Trust ⁽¹⁾	Term of Office and Length of Time Served	Principal Occupation During Past Five Years	Number of Portfolios in Fund Complex ⁽²⁾ Overseen by Trustees	Other Directorships Held During Past Five Years
Independent Trustees of the Trust					
Dorothy A. Berry (born 1943) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Chairman and Trustee	Indefinite Term; Since May 1991.	Formerly, President, Talon Industries, Inc. (business consulting); formerly, Executive Vice President and Chief Operating Officer, Integrated Asset Management (investment adviser and manager) and formerly, President, Value Line, Inc. (investment advisory and financial publishing firm).	1	Director, PNC Funds (23 series), PNC Advantage Funds (1 series).
Wallace L. Cook (born 1939) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Trustee	Indefinite Term; Since May 1991.	Investment Consultant; formerly, Chief Executive Officer, Rockefeller Trust Co., (prior thereto Senior Vice President), and Managing Director, Rockefeller & Co. (Investment Manager and Financial Advisor); formerly, Senior Vice President, Norton Simon, Inc. (international consumer products conglomerate).	1	Trustee, The Dana Foundation.
Eric W. Falkeis (born 1973) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Trustee	Indefinite Term; Since September 2011.	Chief Operating Officer, Direxion Fund since 2013; formerly, Senior Vice President and Chief Financial Officer (and other positions), U.S. Bancorp Fund Services, LLC 1997-2013.	1	Interested Trustee, Direxion Funds (22 series), Direxion Shares ETF Trust (112 series) and Direxion Insurance Trust.

	Anti-Money Laundering Officer	Indefinite Term: Since July 2011.			
	Vice President	Indefinite Term: Since July 2011			

(1) The Trustees of the Trust are not “interested persons” of the Trust as defined under the 1940 Act (“Independent Trustees”).

(2) The Trust is comprised of numerous series managed by unaffiliated investment advisers. The term “Fund Complex” applies to the Fund. The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor does it share the same investment advisor with any other series.

Additional Information Concerning the Board of Trustees

The Role of the Board

The Board oversees the management and operations of the Trust. Like all mutual funds, the day-to-day management and operation of the Trust is the responsibility of the various service providers to the Trust, such as the Advisor, the Distributor, the Administrator, the Custodian, and the Transfer Agent, each of whom are discussed in greater detail in this Statement of Additional Information. The Board has appointed various senior employees of the Administrator as officers of the Trust, with responsibility to monitor and report to the Board on the Trust’s operations. In conducting this oversight, the Board receives regular reports from these officers and the service providers. For example, the Treasurer reports as to financial reporting matters and the President reports as to matters relating to the Trust’s operations. In addition, the Advisor provides regular reports on the investment strategy and performance of the Fund. The Board has appointed a Chief Compliance Officer who administers the Trust’s compliance program and regularly reports to the Board as to compliance matters. These reports are provided as part of formal “Board Meetings” which are typically held quarterly, in person, and involve the Board’s review of recent operations. In addition, various members of the Board also meet with management in less formal settings, between formal “Board Meetings,” to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust and its oversight role does not make the Board a guarantor of the Trust’s investments, operations or activities.

Board Structure, Leadership

The Board has structured itself in a manner that it believes allows it to perform its oversight function effectively. It has established three standing committees, a Nominating Committee, an Audit Committee, and a Qualified Legal Compliance Committee, which are discussed in greater detail below under “Trust Committees”. The Board is comprised of Trustees who are all Independent Trustees, which are Trustees that are not affiliated with the Advisor, the principal underwriter, or their affiliates. The Nominating Committee, Audit Committee and Qualified Legal Compliance Committee are comprised entirely of Independent Trustees. The Chairman of the Board is an Independent Trustee. The Board has determined not to combine the Chairman position and the principal executive officer position and has appointed a Vice President of the Administrator as the President of the Trust. The Board reviews its structure and the structure of its committees annually. The Board has determined that the structure of the

Independent Chairman, the composition of the Board, and the function and composition of its various committees are appropriate means to address any potential conflicts of interest that may arise.

Board Oversight of Risk Management

As part of its oversight function, the Board of Trustees receives and reviews various risk management reports and discusses these matters with appropriate management and other personnel. Because risk management is a broad concept comprised of many elements (*e.g.*, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.), the oversight of different types of risks is handled in different ways. For example, the Audit Committee meets with the Treasurer and the Trust's independent registered public accounting firm to discuss, among other things, the internal control structure of the Trust's financial reporting function. The Board meets regularly with the Chief Compliance Officer to discuss compliance and operational risks and how they are managed. The Board also receives reports from the Advisor as to investment risks of the Fund. In addition to these reports, from time to time the Board receives reports from the Administrator and the Advisor as to enterprise risk management.

Information about Each Trustee's Qualification, Experience, Attributes or Skills

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills ("Trustee Attributes") appropriate to their continued service as Trustees of the Trust in light of the Trust's business and structure. In addition to a demonstrated record of business and/or professional accomplishment, each of the Trustees has served on the Board for a number of years. They have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. They have demonstrated a commitment to discharging their oversight duties as trustees in the interests of shareholders. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board and individual Trustees is reviewed.

In addition to the information provided in the chart above, below is certain additional information concerning each particular Trustee and his/her Trustee Attributes. The information is not all-inclusive. Many Trustee Attributes involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, to ask incisive questions, and commitment to shareholder interests.

Ms. Berry's Trustee Attributes include her substantial mutual fund experience, including her role as a member of the Board of Governors of the Investment Company Institute and its Executive Committee. She was also a member of the Independent Directors Council and has served two terms as its Chairman. She has executive experience as the President (retired) of Talon Industries, Inc. (a business consulting company) and through her former positions as the Executive Vice President and Chief Operating Officer of Integrated Asset Management (an investment adviser and manager) and as the President of Value Line, Inc. (an investment advisory and financial publishing firm). Ms. Berry also serves on the board of another investment management company. Ms. Berry has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Ms. Berry's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that she possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Cook's Trustee Attributes include his substantial investment and executive experience through his investment consulting business, his position as a Trustee of several investment trusts (including private investment trusts) and his ongoing responsibility for investing the assets of a major foundation, as well as his former position as Chief Executive Officer of Rockefeller Trust Company (an investment manager and financial advisor) and senior vice president of a Fortune 500 company. Mr. Cook has been determined to qualify as an Audit Committee financial expert for the Trust. The Board

believes Mr. Cook's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Falkeis' Trustee Attributes include his substantial mutual fund experience and his experience with financial, accounting, investment and regulatory matters through his former position as Senior Vice President and Chief Financial Officer (and other positions) of U.S. Bancorp Fund Services, LLC, a full service provider to mutual funds and alternative investment products. In addition, he has experience consulting with investment advisors regarding the legal structure of mutual funds, distribution channel analysis and actual distribution of those funds. Mr. Falkeis also has substantial managerial, operational, technology and risk oversight experience through his position as Chief Operating Officer of the Direxion Funds and the Direxion Exchange Traded Funds. Mr. Falkeis also serves as Interested Trustee of Direxion Funds. Mr. Falkeis has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Mr. Falkeis' experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Froebel's Trustee Attributes include his significant systems and operations experience. He was a Director of Scudder, Stevens & Clark (with responsibility for its systems department) and founder and President of Systems Dynamics Corp. ("SDC") and later Vice President of Bradford Computer & Systems after its acquisition of SDC, (providing record keeping and reporting for investment advisors and mutual funds). He also served as Vice President of Automatic Data Processing (automated services to the brokerage and investment advisory industry) and was the former President and founder of National Investor Data Services, Inc. (a software and computer vendor to the mutual fund industry with fund accounting and transfer agent systems). Mr. Froebel has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Mr. Froebel's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Paggioli's Trustee Attributes include his substantial mutual fund and investment advisory experience. Mr. Paggioli is an independent consultant on investment company and investment advisory matters. He has held a number of senior positions with mutual fund and investment advisory organizations and related businesses, including Executive Vice President, Director and Principal of the Wadsworth Group (fund administration, distribution transfer agency and accounting services). He serves on the boards of several investment management companies and advisory firms. He is a member of the Board of Governors of the Investment Company Institute. He has served on various industry association and self-regulatory committees and formerly worked on the staff of the Securities and Exchange Commission. Mr. Paggioli has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Mr. Paggioli's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Trust Committees

The Trust has three standing committees: the Nominating Committee, and the Audit Committee, which also serves as the Qualified Legal Compliance Committee ("QLCC").

The Nominating Committee, comprised entirely of the Independent Trustees, is responsible for seeking and reviewing candidates for consideration as nominees for Trustees and meets only as necessary. The Nominating Committee will consider nominees nominated by shareholders. Recommendations by shareholders for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed

Nominee, and such recommendation must comply with the notice provisions set forth in the Trust By-Laws. In general, to comply with such procedures, such nominations, together with all required biographical information, must be delivered to and received by the President of the Trust at the principal executive offices of the Trust not later than 120 days and no more than 150 days prior to the shareholder meeting at which any such nominee would be voted on. The Nominating Committee did not meet during the Fund's last fiscal year.

The Audit Committee is comprised entirely of Independent Trustees. The Audit Committee generally meets on a quarterly basis with respect to the various series of the Trust, and may meet more frequently. The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the audit of such series' financial statements and any matters bearing on the audit or the financial statements, and to ensure the integrity of the series' pricing and financial reporting. The Audit Committee met once with respect to the Fund during the Fund's last fiscal year.

The function of the QLCC is to receive reports from an attorney retained by the Trust of evidence of a material violation by the Trust or by any officer, director, employee or agent of the Trust. The QLCC did not meet during the Fund's last fiscal year.

Additionally, the Board has delegated day-to-day valuation issues to a Valuation Committee that is comprised of certain officers of the Trust and is overseen by the Trustees. The function of the Valuation Committee is to value securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by the Valuation Committee, and the actions of the Valuation Committee are subsequently reviewed and ratified by the Board. The Valuation Committee meets as needed. The Valuation Committee met six times with respect to the Fund during the Fund's last fiscal year.

Trustee Ownership of Fund Shares and Other Interests

The following table shows the amount of shares in the Fund and the amount of shares in other portfolios of the Trust owned by the Trustees as of the calendar year ended December 31, 2017.

Name	Dollar Range of Fund Shares	Aggregate Dollar Range of Fund Shares in the Trust
Independent Trustees		
Dorothy A. Berry	None	Over \$100,000
Wallace L. Cook	None	Over \$100,000
Eric W. Falkeis	None	Over \$100,000
Carl A. Froebel	None	Over \$100,000
Steven J. Paggioli	None	Over \$100,000

Compensation

Independent Trustees each receive an annual retainer of \$125,000 allocated among each of the various portfolios comprising the Trust. The Chairman of the Board receives an additional annual retainer of \$20,000 also allocated among each of the various portfolios comprising the Trust. Independent Trustees receive additional fees from applicable portfolios for any special meetings at rates assessed by the Trustees depending on the length of the meeting and whether in-person attendance is required. All Trustees will be reimbursed for expenses in connection with each Board meeting attended. These reimbursements are allocated among applicable portfolios of the Trust. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees. Set forth below is the rate of compensation received by the following Independent Trustees from the Fund for the fiscal year ending October 31, 2017.

Name of Person/Position	Aggregate Compensation From the Fund	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Annual Benefits Upon Retirement	Total Compensation from Fund and Fund Complex ⁽¹⁾ Paid to Trustees
Dorothy A. Berry, Independent Trustee	\$3,807	None	None	\$3,807
Wallace L. Cook, Independent Trustee	\$3,156	None	None	\$3,156
Eric W. Falkeis, Independent Trustee	\$3,156	None	None	\$3,156
Carl A. Froebel, Independent Trustee	\$3,156	None	None	\$3,156
Steve J. Paggioli, Independent Trustee	\$3,156	None	None	\$3,156

⁽¹⁾ There are currently numerous unaffiliated portfolios comprising the Trust. The term “Fund Complex” applies only to the Fund. For the fiscal period ending October 31, 2017, aggregate Trustees’ fees of \$645,000 were incurred by the Trust.

Codes of Ethics

The Trust, the Advisor and the principal underwriter have each adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, personnel of the Advisor and Distributor to invest in securities that may be purchased or held by the Fund.

PROXY VOTING POLICIES AND PROCEDURES

The Board has adopted Proxy Voting Policies and Procedures (“Proxy Policies”) on behalf of the Trust which delegate the responsibility for voting proxies to the Advisor, subject to the Board’s continuing oversight. The Proxy Policies require that the Advisor vote proxies received in a manner consistent with the best interests of the Fund and their shareholders. The Proxy Policies also require the Advisor to present to the Board, at least annually, the Advisor’s Proxy Policies and a record of each proxy voted by the Advisor on behalf of the Fund, including a report on the resolution of all proxies identified by the Advisor as involving a conflict of interest.

The Advisor has adopted Proxy Policies that underscore the Advisor’s concern that all proxies voting decisions be made in the best interest of the Fund’s shareholders. The Advisor considers each proxy proposal individually and makes decisions on a case-by-case basis. At all times, however, the Advisor will act in a prudent and diligent manner intended to enhance the economic value of the assets of the Fund. The Advisor believes that market conditions and other economic considerations will influence how decisions are made on proxy proposals. Where a proxy proposal raises a material conflict between the Advisor’s interests and the Fund’s interests, the Advisor will disclose the conflict to the Board and obtain the Board’s consent to vote or direct the matter to an independent third party, selected by the Board, for a vote determination. If the Board’s consent or the independent third party’s determination is not received in a timely manner, the Advisor will abstain from voting the proxy.

The Trust is required to file a Form N-PX, with the Fund’s complete proxy voting record for the 12 months ended June 30, no later than August 31 of each year. Form N-PX for the Fund will be available without charge, upon request, by calling toll-free 1-855-681-5261 and on the SEC’s website at www.sec.gov.

CONTROL PERSONS, PRINCIPAL SHAREHOLDERS AND MANAGEMENT OWNERSHIP

A principal shareholder is any person who owns of record or beneficially owns 5% or more of the outstanding shares of the Fund. A control person is any person who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control. As of January 31, 2018, the Trustees and Officers of the Trust as a group did not own more than 1% of the outstanding shares of the Fund. Furthermore, neither the Trustees, nor members of their immediate family, own securities beneficially or of record in the Advisor, the Fund's principal underwriter, or any of their affiliates. Accordingly, neither the Trustees, nor members of their immediate family, have a direct or indirect interest, the value of which exceeds \$120,000, in the Advisor, the Fund's principal underwriter or any of their affiliates. As of January 31, 2018, the following shareholders were considered to be either a control person or principal shareholder of the Fund:

Principal Holders of Otter Creek Long-Short Opportunity Fund – Institutional Shares

Name and Address	% Ownership	Type of Ownership
National Financial Services, LLC 499 Washington Blvd. Jersey City, NJ 07310-2010	47.41%	Record
Charles Schwab & Co, Inc. 211 Main St. San Francisco, CA 94105-1905	33.70%	Record
Vanguard Brokerage Services P.O. Box 1170 Valley Forge, PA 19482-1170	13.22%	Record

Principal Holders of Otter Creek Long-Short Opportunity Fund – Investor Shares

Name and Address	% Ownership	Type of Ownership
National Financial Services, LLC 499 Washington Blvd. Jersey City, NJ 07310-2010	46.82%	Record
Charles Schwab & Co, Inc. 211 Main St. San Francisco, CA 94105-1905	37.47%	Record

Control Persons Over 25%

Name and Address	% Ownership	Type of Ownership	Jurisdiction
National Financial Services, LLC 499 Washington Blvd. Jersey City, NJ 07310-2010	47.35%	Record	Delaware
Charles Schwab & Co, Inc. 211 Main St. San Francisco, CA 94105-1905	33.88%	Record	California

THE FUND'S INVESTMENT ADVISOR

Otter Creek Advisors, LLC acts as investment advisor to the Fund pursuant to an investment advisory agreement (the "Advisory Agreement") with the Trust, on behalf of the Fund. The Advisor is located at 11300 US Highway 1, Suite 500, Palm Beach Gardens, Florida 33408. R. Keith Long is the sole control person of the Advisor. Prior to February 27, 2015, the Fund was managed by an affiliate of the Advisor, Otter Creek Management, Inc., which was founded by Mr. Long in 1991.

The Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and by a majority of the Independent Trustees, who are not parties to the Advisory Agreement or interested persons of any such party, in each case cast in person at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Fund on not more than 60 days', nor less than 30 days', written notice to the Advisor when authorized either by a majority vote of the Fund's shareholders or by a vote of a majority of the Trustees, or by the Advisor on not more than 60 days', nor less than 30 days', written notice to the Trust, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Advisor shall not be liable under such agreement for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or gross negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

In consideration of the services provided by the Advisor pursuant to the Advisory Agreement, the Advisor is entitled to receive from the Fund an investment advisory fee computed daily and paid monthly, based on a rate equal to 1.50% of the Fund's average daily net assets, as specified in the Fund's Prospectus. However, the Advisor may voluntarily agree to reduce a portion of the fees payable to it on a month-to-month basis.

Fiscal Year Ended	Fees Accrued	Fees Waived	Net Fees Paid to Advisor
October 31, 2017	\$4,709,280	\$94,654	\$4,614,626
October 31, 2016	\$4,061,150	\$83,723	\$3,977,427
October 31, 2015*	\$1,673,023	\$128,743	\$1,544,280

*Fees paid prior to February 27, 2015 were paid to the previous investment advisor.

The Fund is responsible for its own operating expenses. The Advisor has contractually agreed to reduce fees and/or pay Fund expenses (excluding Acquired Fund Fees and Expense, interest, taxes, interest and dividend expense on securities sold short, and extraordinary expenses) in order to the limit Net Annual Fund Operating Expenses for shares of the Fund to 1.95% and 1.70% for the Investor Shares and Institutional Shares, respectively (the "Expense Caps"). The Fund's net operating expenses may be higher to the extent that the Fund incurs expenses that are not covered under the operating expenses limitation agreement. The current Expense Caps are in place indefinitely, but at a minimum will remain in effect through February 28, 2019. The Advisor is permitted, with Board approval, to be reimbursed for fee reductions and/or expense payments made in the prior three years from the date the fees were waived and expenses were paid. This reimbursement may be requested if the aggregate amount actually paid by the Fund toward operating expenses for such period (taking into account any reimbursement) does not exceed the lesser of the Expense Caps in place at the time of waiver or at the time of reimbursement.

PORTFOLIO MANAGERS

Messrs. Michael J. Winter and Tyler C. Walling (collectively the "Portfolio Managers"), serve as the Portfolio Managers for the Fund, each of whom are jointly and primarily responsible for the day-to-day management of the Fund.

The following provides information regarding other accounts managed by Mr. Walling as of October 31, 2017:

Category of Account	Total Number of Accounts Managed	Total Assets in Accounts Managed	Number of Accounts for which Advisory Fee is Based on Performance	Assets in Accounts for which Advisory Fee is Based on Performance
Other Registered Investment Companies	0	0	None	N/A
Other Pooled Investment Vehicles	2	\$96.5 million	2	\$96.5 million
Other Accounts	None	N/A	None	N/A

The following provides information regarding other accounts managed by Mr. Winter as of October 31, 2017:

Category of Account	Total Number of Accounts Managed	Total Assets in Accounts Managed	Number of Accounts for which Advisory Fee is Based on Performance	Assets in Accounts for which Advisory Fee is Based on Performance
Other Registered Investment Companies	0	0	None	N/A
Other Pooled Investment Vehicles	2	\$96.5 million	2	\$96.5 million
Other Accounts	None	N/A	None	N/A

Portfolio managers receive a base salary and a discretionary bonus. Their salary is not based on the Fund's performance. However, there is the potential for the portfolio managers to receive a bonus based on increases in assets as part of their compensation. The portfolio managers may also indirectly receive compensation for any other accounts that are managed by the Advisor as they participate in the success of the Firm. The portfolio managers also have an ownership interest in the Advisor, which provides them with profit sharing incentive. The portfolio managers do not receive deferred compensation but do participate in a 401(k) retirement plan.

Because the Advisor performs investment management services for various clients, certain conflicts of interest could arise. The Advisor may give advice and take action with respect to its other clients and/or funds that may differ from advice given or the timing or nature of action taken with respect to the Fund. The Advisor will have no obligation to purchase or sell for the Fund, or to recommend for purchase or sale by the Fund, any security that the Advisor, its principals, its affiliates, or its employees may purchase for themselves or for other clients and/or funds at the same time or the same price. Where the Advisor buys or sells the same security for two or more clients, it may place concurrent orders with a

single broker, to be executed together as a single “block” in order to facilitate orderly and efficient execution.

Portfolio Managers’ Ownership Interest in the Fund

The following indicates the beneficial ownership of each portfolio manager in the Otter Creek Long Short Opportunity Fund as of October 31, 2017:

Portfolio Manager	Dollar Range of Shares Owned
Tyler C. Walling	\$500,001-\$1,000,000
Michael J. Winter	\$500,001-\$1,000,000

Managing Conflicts of Interest

Actual or apparent material conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one investment account or in other circumstances. Portfolio managers of the Fund may be presented with potential conflicts of interest in the allocation of investment opportunities, the allocation of their time and investment ideas and the allocation of aggregated orders among the Fund’s accounts and other accounts managed by the portfolio managers, including among any affiliated client accounts, any accounts in which the portfolio managers may have personal investments.

It is anticipated that in addition to acting as the Advisor to the Fund, the Advisor will serve as the investment adviser for individual, corporate and retirement accounts for U.S. and non-U.S. clients. The portfolio managers of the Advisor expect to make and retain significant personal investments in the Fund that will help to align the interests of the Fund and the portfolio managers. Further, the Advisor will adopt policies and procedures governing all of its personnel that will be reasonably designed to ensure that all clients are treated equitably and that the Fund is not disadvantaged by other activities of the Advisor. The Advisor has adopted a Code of Ethics governing its principals and employees that are designed to detect and equitably manage conflicts of interest when personnel of the Advisor own, buy, or sell securities that may be owned by, or bought or sold for, other clients of the Advisor, including the Fund.

The portfolio managers manage two sub-advised accounts, so there is a potential conflict of interest as the two sub-advised accounts are performance fee paying. In order to mitigate this conflict, trade orders are bunched to the greatest extent possible in order for all accounts to receive the same execution price. If the trades cannot be bunched, as is the case for short securities, the trades are posted separately for each relationship (CFDs versus shorts). At the end of the day, all trades are allocated pro-rata based off of adjusted net assets in order to have the same net exposure across all of the accounts unless they were pre-allocated prior to execution.

SERVICE PROVIDERS

Administrator, Transfer Agent and Fund Accountant

Pursuant to an administration agreement (the “Administration Agreement”), U.S. Bancorp Fund Services, LLC, (“USBFS”) 615 East Michigan Street, Milwaukee, Wisconsin 53202 acts as the Administrator to the Fund. USBFS provides certain services to the Fund including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations, excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV and yield; responding to shareholder inquiries; and

arranging for the maintenance of books and records of the Fund, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, USBFS does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of the Fund’s shares.

Pursuant to the Administration Agreement, as compensation for its services, USBFS receives from the Fund, a fee based on the Fund’s current average daily net assets. USBFS also is entitled to certain out-of-pocket expenses. USBFS also acts as fund accountant, transfer agent and dividend disbursing agent under separate agreements. Additionally, USBFS provides Chief Compliance Officer services to the Trust under a separate agreement. The cost for the Chief Compliance Officer services is charged to the Fund and approved by the Board annually.

The table below shows the amount of administration fees paid by the Funds to USBFS for the fiscal year shown.

Fiscal Year Ended	Administration Fee Paid
October 31, 2017	\$157,003
October 31, 2016	\$136,082
October 31, 2015	\$63,230

Custodian

U.S. Bank National Association, is the custodian of the assets of the Fund (the “Custodian”) pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian provides for fees on a transactional basis plus out-of-pocket expenses. The Custodian’s address is 1555 N. River Center Drive, Suite 302, Milwaukee, Wisconsin 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Fund. USBFS, the Custodian, and the Fund’s principal underwriter are affiliated entities under the common control of U.S. Bancorp. The Custodian and its affiliates may participate in revenue sharing arrangements with the service providers of mutual funds in which the Fund may invest.

Independent Registered Public Accounting Firm and Legal Counsel

Tait, Weller & Baker LLP, is the independent registered public accounting firm, providing audit services, tax services and assistance with respect to the preparation of filings with the U.S. Securities and Exchange Commission for the Fund.

Schiff Hardin LLP, 666 Fifth Avenue, Suite 1700, New York, New York 10103, serves as legal counsel to the Trust.

EXECUTION OF PORTFOLIO TRANSACTIONS

Pursuant to the Advisory Agreement, the Advisor determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund’s portfolio transactions. Purchases and sales of securities in the over-the-counter market will generally be executed directly with a “market-maker” unless, in the opinion of the Advisor, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Fund also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) which specialize in the types of securities which the Fund will be holding, unless better executions are available elsewhere. Dealers and underwriters usually act as principal for their own accounts.

Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Advisor will seek best execution. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Advisor that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other services in addition to execution services. The Advisor considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Agreement with the Fund, to be useful in varying degrees, but of indeterminable value. Portfolio transactions may be placed with broker-dealers who sell shares of the Fund subject to rules adopted by Financial Industry Regulatory Authority ("FINRA") and the SEC.

While it is the Advisor's general policy to seek best execution in selecting a broker-dealer to execute portfolio transactions for the Fund, in accordance with Section 28(e) under the Securities and Exchange Act of 1934, when it is determined that more than one broker can deliver best execution, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Advisor, even if the specific services are not directly useful to the Fund and may be useful to the Advisor in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Advisor to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer.

Investment decisions for the Fund are made independently from those of other client accounts or mutual funds managed or advised by the Advisor. Nevertheless, it is possible that at times identical securities will be acceptable for both the Fund and one or more of such client accounts or mutual funds. In such event, the position of the Fund and such client account(s) or mutual funds in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts or mutual funds seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts or mutual funds simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts or mutual funds in a manner deemed equitable by the Advisor, taking into account the respective sizes of the accounts and the amount of cash available for investment, the investment objective of the account, and the ease with which a client's appropriate amount can be bought, as well as the liquidity and volatility of the account and the urgency involved in making an investment decision for the client. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund.

The Fund does not effect securities transactions through brokers in accordance with any formula, nor does it effect securities transactions through brokers for selling shares of the Fund. However, as stated above, broker-dealers who execute brokerage transactions may effect purchase of shares of the Fund for their customers.

The following table describes the brokerage transactions directed to brokers during the fiscal year ended October 31, 2017, due to research services provided to the Advisor.

Amount of Transactions	Brokerage Commissions
\$27,846,148	\$16,966

The table below shows the amount of aggregate brokerage commissions paid by the Fund with respect to transactions for the fiscal years ended October 31:

	2015	2016	2017
Aggregate Brokerage Commissions Paid by the Fund	\$421,152.43	\$1,075,869*	\$1,278,999

*The significant growth of aggregate brokerage commissions from the amount paid in 2015 is due to a significant growth in Fund assets as well as an increase in the commission paid as soft dollars.

The Fund did not own securities of any of its regular brokers or dealers as of the fiscal year ended October 31, 2017.

CAPITAL STOCK

Shares issued by the Fund have no preemptive, conversion or subscription rights. Shareholders have equal and exclusive rights as to dividends and distributions as declared by the Fund and to the net assets of the Fund upon liquidation or dissolution. The Fund, as separate series of the Trust, votes separately on matters affecting only the Fund (*e.g.*, approval of the Advisory Agreement); all series of the Trust vote as a single class on matters affecting all series jointly or the Trust as a whole (*e.g.*, election or removal of Trustees). Voting rights are not cumulative, so that the holders of more than 50% of the shares voting in any election of Trustees can, if they so choose, elect all of the Trustees. While the Trust is not required and does not intend to hold annual meetings of shareholders, such meetings may be called by the Trustees in their discretion or upon demand by the holders of 10% or more of the outstanding shares of the Trust, for the purpose of electing or removing Trustees.

DETERMINATION OF SHARE PRICE

The NAV per share of the Fund is determined as of the close of regular trading on the New York Stock Exchange (the "NYSE") (generally, 4:00 p.m., Eastern time), each day the NYSE is open for trading. The NYSE annually announces the days on which it will not be open for trading. It is expected that the NYSE will not be open for trading on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The Fund does not expect to determine the NAV of shares on any day when the Exchange is not open for trading even if there is sufficient trading in its portfolio securities on such days to materially affect the NAV per share.

Generally, the Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Trust's Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Valuation Committee considers, among other things: (1) the last sales price on the securities exchange, if any, on which a security is primarily traded; (2) the mean between the bid and asked prices; (3) price quotations from an approved pricing service, and (4) other factors as necessary to determine a fair value under certain circumstances.

To the extent the Fund's portfolio investments trade in markets on days when the Fund is not open for business, the Fund's assets may vary on those days. In addition, trading in certain portfolio investments may not occur on days the Fund is open for business. If the exchange or market on which the Fund's underlying investments are primarily traded closes early, the NAV may be calculated prior to its normal calculation time. For example, the primary trading markets for the Fund may close early on the day before certain holidays and the day after Thanksgiving.

In valuing the Fund's assets for calculating NAV, readily marketable portfolio securities listed on a national securities exchange are valued at the last sale price on the business day as of which such value is being determined. If there has been no sale on such exchange on such day, the security is valued at the mean between the bid and asked prices on such day. Securities primarily traded in the Nasdaq National Market System ("NASDAQ") for which market quotations are readily available shall be valued using the Nasdaq Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the mean between the bid and asked prices. Readily marketable securities traded only in the OTC market and not on NASDAQ are valued at the most recent trade price. All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect their fair value.

The Fund values securities for which market quotations are readily available at current market value other than certain short-term securities. Exchange-traded securities for which market quotations are readily available are valued using the last reported sales price provided by independent pricing services as of the close of trading on the NYSE (normally 4:00 p.m. Eastern time) on each Fund business day. In the absence of sales, such securities are valued at the mean of the last bid and ask price. Non-exchange-traded securities for which quotations are readily available are generally valued at the mean between the current bid and asked price. Fixed income securities may be valued at prices supplied by the Fund's pricing agent based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Investments in other open-end regulated investment companies are valued at their NAV. If the Fund invests in securities that trade on foreign securities markets on days other than the Fund business day, the value of the Fund's portfolio may change on days that shareholders will not be able to purchase or redeem Fund Shares.

Trading in foreign securities markets is normally completed well before the close of the NYSE. In addition, foreign securities trading may not take place on all days on which the NYSE is open for trading, and may occur in certain foreign markets on days on which the Fund's NAV is not calculated. Events affecting the values of portfolio securities that occur between the time their prices are determined and the close of the NYSE will not be reflected in the calculation of NAV unless the Board deems that the particular event would affect NAV, in which case an adjustment will be made in such manner as the Board in good faith deems appropriate to determine fair market value. Assets or liabilities expressed in foreign currencies are translated, in determining NAV, into U.S. dollars based on the spot exchange rates, or at such other rates as the Advisor, pursuant to fair value procedures adopted by the Board, may determine to be appropriate.

Securities primarily traded on U.S. national or foreign securities exchanges for which market quotations are readily available shall be valued at either the last reported sale price on the day of valuation, or the exchange's official closing price, if applicable. If there has been no sale on such day, then the mean between the bid and asked prices will be used. Securities and assets for which market quotations are not readily available (including restricted securities which are subject to limitations as to their sale) are valued at fair value as determined in good faith under procedures approved by or under the direction of the Board.

The securities in the Fund's portfolio, including ADRs, which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of

business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and asked price. Securities that are traded on more than one exchange are valued on the exchange on which the security is principally traded.

All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect their fair value.

ADDITIONAL PURCHASE AND REDEMPTION INFORMATION

The information provided below supplements the information contained in the Prospectus regarding the purchase and redemption of the Fund's shares.

How to Buy Shares

In addition to purchasing shares directly from the Fund, you may purchase shares of the Fund through certain financial intermediaries and their agents that have made arrangements with the Fund and are authorized to buy and sell shares of the Fund (collectively, "Financial Intermediaries"). Investors should contact their Financial Intermediary directly for appropriate instructions, as well as information pertaining to accounts and any service or transaction fees that may be charged. If you transmit your order to these Financial Intermediaries before the close of regular trading (generally, 4:00 p.m., Eastern time) on a day that the NYSE is open for business, your order will be priced at the Fund's NAV next computed after it is received by the Financial Intermediary. Investors should check with their Financial Intermediary to determine if it participates in these arrangements.

The public offering price of the Fund's shares is the NAV. Shares are purchased at the public offering price next determined after the transfer agent receives your order in proper form, as discussed in the Fund's Prospectus. In order to receive that day's public offering price, the transfer agent must receive your order in proper form before the close of regular trading on the NYSE, generally, 4:00 p.m., Eastern time.

The Trust reserves the right in its sole discretion (i) to suspend the continued offering of the Fund's shares and (ii) to reject purchase orders in whole or in part when in the judgment of the Advisor or the distributor such rejection is in the best interest of the Fund. The Trust has granted limited authority to the Advisor to reduce or waive the minimum for initial and subsequent investments for certain fiduciary accounts or under circumstances where certain economies can be achieved in sales of the Fund's shares.

In addition to cash purchases, the Fund's shares may be purchased by tendering payment in-kind in the form of shares of stock, bonds or other securities. Any securities used to buy the Fund's shares must be readily marketable, their acquisition consistent with the Fund's objective and otherwise acceptable to the Advisor and the Board.

Automatic Investment Plan

As discussed in the Prospectus, the Fund provide an Automatic Investment Plan ("AIP") for the convenience of investors who wish to purchase shares of the Fund on a regular basis. All record keeping and custodial costs of the AIP are paid by the Fund. The market value of the Fund's shares is subject to fluctuation. Prior to participating in the AIP the investor should keep in mind that this plan does not assure a profit nor protect against depreciation in declining markets.

How to Sell Shares and Delivery of Redemption Proceeds

You can sell your Fund shares any day the NYSE is open for regular trading, either directly to the Fund or through your Financial Intermediary. The Fund typically sends redemption proceeds on the next

business day (a day when the NYSE is open for normal business) after the redemption request is received in good order and prior to market close, regardless of whether the redemption proceeds are sent via check, wire, or automated clearing house (ACH) transfer. Under unusual circumstances, the Fund may suspend redemptions, or postpone payment for up to seven days, as permitted by federal securities law.

The Fund typically expects that it will hold cash or cash equivalents to meet redemption requests. The Fund may also use the proceeds from the sale of portfolio securities to meet redemption requests if consistent with the management of the Fund. In situations in which investment holdings in cash or cash equivalents are not sufficient to meet redemption requests or when the sale of portfolio securities is not sufficient to meet redemption requests, the Fund will typically borrow money through its line of credit. These redemption methods will be used regularly and may also be used in stressed market conditions. The Fund reserves the right to pay redemption proceeds to you in whole or in part through a redemption in-kind as described under “Redemptions In-Kind” below. Redemptions in-kind are typically used to meet redemption requests that are a large percentage of the Fund’s net assets in order to minimize the effect of large redemptions on the Fund and its remaining shareholders. Redemptions in-kind may be used regularly in such circumstances and may also be used in stressed market conditions.

The Fund may suspend the right of redemption or postpone the date of payment during any period when (a) trading on the NYSE is restricted as determined by the SEC or the NYSE is closed for other than weekends and holidays; (b) an emergency exists as determined by the SEC making disposal of portfolio securities or valuation of net assets of the Fund not reasonably practicable; or (c) for such other period as the SEC may permit for the protection of the Fund’s shareholders.

The value of shares on redemption or repurchase may be more or less than the investor’s cost, depending upon the market value of the Fund’s portfolio securities at the time of redemption or repurchase.

Telephone Redemptions

Shareholders with telephone transaction privileges established on their account may redeem the Fund’s shares by telephone. Upon receipt of any instructions or inquiries by telephone from the shareholder the Fund or its authorized agents may carry out the instructions and/or to respond to the inquiry consistent with the shareholder’s previously established account service options. For joint accounts, instructions or inquiries from either party will be carried out without prior notice to the other account owners. In acting upon telephone instructions, the Fund and its agents use procedures that are reasonably designed to ensure that such instructions are genuine. These include recording all telephone calls, requiring pertinent information about the account and sending written confirmation of each transaction to the registered owner.

The transfer agent will employ reasonable procedures to confirm that instructions communicated by telephone are genuine. If the transfer agent fails to employ reasonable procedures, the Fund and the transfer agent may be liable for any losses due to unauthorized or fraudulent instructions. If these procedures are followed, however, that to the extent permitted by applicable law, neither the Fund nor its agents will be liable for any loss, liability, cost or expense arising out of any redemption request, including any fraudulent or unauthorized request. For additional information, contact the transfer agent.

Redemptions In-Kind

The Trust has elected to be governed by Rule 18f-1 under the 1940 Act so that the Fund is obligated to redeem its shares in cash up to the lesser of \$250,000 or 1% of its net asset value during any 90-day period for any shareholder of the Fund. The Fund has reserved the right to pay the redemption price of its shares in excess of \$250,000 or 1% of its net asset value, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV for the shares being sold. If a

shareholder receives a distribution in-kind, the shareholder could incur brokerage or other charges in converting the securities to cash and will bear any market risks associated with such securities until they are converted into cash. A redemption in-kind is treated as a taxable transaction and a sale of the redeemed shares, generally resulting in capital gain or loss to you, subject to certain loss limitation rules.

The Fund does not intend to hold any significant percentage of its portfolio in illiquid securities, although the Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event the Fund were to elect to make an in-kind redemption, the Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. The Fund does not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

DISTRIBUTIONS AND TAX INFORMATION

Distributions

Net investment income generally consists of interest income and dividends received on investments, less expenses. Dividends from net investment income generally are made at least annually. Capital gain distributions from net profits from the sale of securities are generally made at least annually. The Fund typically distributes any undistributed net investment income on or about December 31 of each year. Any net capital gains realized through the period ended October 31 of each year also will be distributed by December 31 of each year.

Each distribution by the Fund is accompanied by a brief explanation of the form and character of the distribution. In January of each year, the Fund will issue to each shareholder a statement of the federal income tax status of all distributions.

Tax Information

Each series of the Trust is treated as a separate entity for federal income tax purposes. The Fund has elected and intends to continue to qualify to be treated as a "regulated investment company" under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and to comply with all applicable requirements regarding the source of its income, diversification of its assets, and the timing and amount of its distributions. If the Fund fails to qualify as a regulated investment company under Subchapter M, it will be taxed as a regular corporation. The Fund's policy is to distribute to its shareholders all of its investment company taxable income and any net realized capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes. However, the Fund can give no assurances that its distributions will be sufficient to eliminate all taxes at the Fund level. To avoid a nondeductible 4% excise tax, the Fund must also distribute (or be deemed to have distributed) by December 31 of each calendar year (i) at least 98% of its ordinary income for such year, (ii) at least 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax.

In order to qualify as a regulated investment company, the Fund must, among other things, derive at least 90% of its gross income each year from dividends, interest, payments with respect to loans of stock and securities, gains from the sale or other disposition of stock or securities or foreign currency gains related to investments in stock or securities, or other income (generally including gains from options, futures or forward contracts) derived with respect to the business of investing in stock, securities or currency, and net income derived from an interest in a qualified publicly traded partnership. The Fund must also satisfy the following two asset diversification tests. At the end of each quarter of each taxable year, (i) at least 50% of the value of the Fund's total assets must be represented by cash and cash items (including receivables), U.S. Government securities, the securities of other regulated investment companies, and other securities, with such other securities being limited in respect of any one issuer to an amount not greater than 5% of the value of the Fund's total assets and not more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund's total assets may be invested in the securities of any one issuer (other than U.S. Government securities or the securities of other regulated investment companies), the securities of any two or more issuers (other than the securities of other regulated investment companies) that the Fund controls (by owning 20% or more of their outstanding voting stock) and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or the securities of one or more qualified publicly traded partnerships. The Fund must also distribute each taxable year sufficient dividends to its shareholders to claim a dividends paid deduction equal to at least the sum of 90% of the Fund's investment company taxable income (which generally includes dividends, interest, and the excess of net short-term capital gain over net long-term capital loss) and 90% of the Fund's net tax-exempt interest, if any. There can be no assurance that the Fund's distributions will be sufficient to eliminate all taxes at the Fund level in all years.

Distributions of net investment income and net short-term capital gains generally are taxable to shareholders as ordinary income. A Fund may make taxable distributions to shareholders even during periods in which the share price has declined. For individual shareholders, a portion of the distributions may be qualified dividends currently eligible for taxation at long-term capital gain rates to the extent the Fund reports the amount distributed as a qualifying dividend and certain holding period requirements are met. In the case of corporate shareholders, a portion of the distributions may qualify for the dividends-received deduction to the extent the Fund reports the amount distributed as a qualifying dividend. The aggregate amount so reported as qualified dividend income or as eligible for the dividends received deduction cannot, however, exceed the aggregate amount of qualifying dividends received by the Fund for its taxable year. In view of the Fund's investment policy, it is expected that dividends from domestic corporations will be part of the Fund's gross income and that, accordingly, some but not all of the Fund's distributions may be eligible for treatment as qualified dividend income for non-corporate shareholders and the dividends-received deduction for corporate shareholders. However, the portion of the Fund's gross income attributable to qualifying dividends is largely dependent on the Fund's investment activities for a particular year, and therefore cannot be predicted with any certainty. The deduction, if any, may be reduced or eliminated if the Fund's shares held by an individual investor are held for less than 61 days, or if the Fund's shares held by a corporate investor are treated as debt-financed or are held for less than 46 days.

Federal taxes on the Fund's distribution of long-term capital gains are determined by how long the Fund owned the investments that generated the gains, not how long a shareholder has owned the Fund shares. There is no requirement that the Fund take into consideration any tax implications when implementing its investment strategy. Shareholders should note that the Fund may make taxable distributions of income and capital gains even when share values have declined.

Redemption of Fund shares may result in recognition of a taxable gain or loss. Any loss realized upon redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains during such six-month period. Any loss realized upon a redemption may be disallowed under certain "wash sale"

rules to the extent shares of the Fund are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

Under the Code, the Fund will be required to report to the Internal Revenue Service (“IRS”) all distributions of ordinary income and capital gains as well as gross proceeds from the redemption or exchange of the Fund’s shares, except in the case of exempt shareholders, which includes most corporations. Pursuant to the backup withholding provisions of the Code, distributions of any taxable income and capital gains and proceeds from the redemption of the Fund’s shares may be subject to withholding of federal income tax at the rate of 24% in the case of non-exempt shareholders who fail to furnish the Fund with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the IRS notifies the Fund that such backup withholding is required. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld. Non-corporate and other exempt shareholders should provide the Fund with their taxpayer identification numbers or certify their exempt status, as applicable, in order to avoid possible erroneous application of backup withholding. Backup withholding is not an additional tax and any additional amounts may be credited against a shareholder’s ultimate federal tax liability if proper documentation is provided. The Fund reserves the right to refuse to open an account for any person failing to provide a certified taxpayer identification number.

In addition to the federal income tax, certain individuals, trusts and estates may be subject to a Medicare tax of 3.8%. The Medicare tax is imposed on the lesser of: (i) the taxpayer’s investment income, net of deductions properly allocable to such income, or (ii) the amount by which the taxpayer’s modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund’s distributions are includable in a shareholder’s investment income for purposes of this Medicare tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder’s investment income for purposes of this Medicare tax.

Distributions and the transactions referred to in the preceding paragraphs may be subject to state and local income taxes, and the tax treatment thereof may differ from the federal income tax treatment.

The foregoing discussion of U.S. federal income tax law relates solely to the application of that law to U.S. citizens or residents and U.S. domestic corporations, partnerships, trusts and estates. Each shareholder that is not a U.S. person should consider the U.S. and foreign tax consequences of ownership of shares of the Fund, including the possibility that such a shareholder may be subject to a U.S. withholding tax at the rate of 30% (or a lower rate reduced by treaty).

The Foreign Account Tax Compliance Act (“FATCA”)

A 30% withholding tax on the Fund’s distributions, including capital gains distributions, and on gross proceeds from the sale or other disposition of shares of the Fund generally applies if paid to a foreign entity unless: (i) if the foreign entity is a “foreign financial institution,” it undertakes certain due diligence, reporting, withholding and certification obligations, (ii) if the foreign entity is not a “foreign financial institution,” it identifies certain of its U.S. investors or (iii) the foreign entity is otherwise excepted under FATCA. Subject to the rules above and the applicability of any intergovernmental agreements on FATCA, if applicable, withholding under FATCA is required: (i) generally with respect to distributions from your Fund; and (ii) with respect to certain capital gains distributions and gross proceeds from a sale or disposition of Fund shares that occur on or after January 1, 2019. If withholding is required under FATCA on a payment, investors that otherwise would not be subject to withholding (or that otherwise would be entitled to a reduced rate of withholding) on such payment generally will be required to seek a refund or credit from the IRS to obtain the benefits of such exemption or reduction.

The Fund will not pay any additional amounts in respect to amounts withheld under FATCA. You should consult your tax advisor regarding the effect of FATCA based on your individual circumstances.

The foregoing discussion of tax law is based on existing provisions of the Code, existing and proposed regulations thereunder, and current administrative rulings and court decisions, all of which are subject to change. Any such changes could affect the validity of this discussion. The discussion also represents only a general summary of tax law and practice currently applicable to the Fund and certain shareholders therein and, as such, is subject to change. In particular, the consequences of an investment in shares of the Fund under the laws of any state, local or foreign taxing jurisdictions are not discussed herein. The Fund does not plan to seek a ruling from the IRS or an opinion of counsel with respect to any tax matters. Each prospective investor should consult his or her own tax advisor to determine the application of the tax law and practice in his or her own particular circumstance.

The advice herein was prepared for the Fund. Any person reviewing this discussion should seek advice based on such person's particular circumstances from an independent tax advisor.

THE FUND'S DISTRIBUTOR

Quasar Distributors, LLC, 777 East Wisconsin Avenue, Milwaukee, Wisconsin 53202 ("Quasar"), serves as the Fund's principal underwriter in a continuous public offering of the Fund's shares. Pursuant to a distribution agreement between the Fund and Quasar (the "Distribution Agreement"), Quasar acts as the Fund's principal underwriter and distributor and provides certain administrative services and promotes and arranges for the sale of the Fund's shares. Quasar is a registered broker-dealer under the Securities Exchange Act of 1934, as amended, and is a member of FINRA.

The Distribution Agreement between the Fund and Quasar will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and, in either case, by a majority of the Independent Trustees. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on 60 days' written notice when authorized either by a majority vote of the Fund's shareholders or by vote of a majority of the Board, including a majority of the Independent Trustees, or by Quasar on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

Distribution Plan

The Fund has adopted a Distribution Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act under which the Fund's Investor Class shares pay the Distributor an amount which is accrued daily and paid quarterly, at an annual rate of 0.25% of the average daily net assets of the Investor Class. Amounts paid under the Plan, by the Fund, are paid to the Distributor to compensate broker-dealers and service providers that provide distribution-related services to the Investor Class Shares for the costs of the services provided and the expenses borne in the distribution of the Fund's Shares, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of the Fund's Shares to prospective investors; and preparation, printing and distribution of sales literature and advertising materials. The services provided by selected dealers pursuant to the Plan are primarily designed to promote the sale of shares of the Fund and include the furnishing of office space and equipment, telephone facilities, personnel and assistance to the Fund in servicing such shareholders. The services provided by the administrators pursuant to the Plan are designed to provide support services to the Fund and include establishing and maintaining shareholders' accounts and records, processing purchase and redemption transactions, answering routine client inquiries regarding the Fund and providing other services to the Fund as may be required.

Under the Plan, the Trustees will be furnished quarterly with information detailing the amount of expenses paid under the Plan and the purposes for which payments were made. The Plan may be terminated at any time by vote of a majority of the Trustees of the Trust who are not interested persons. Continuation of the Plan is considered by such Trustees no less frequently than annually. With the exception of the Distributor, in its capacity as the Fund's principal underwriter and distribution coordinator, no interested person has or had a direct or indirect financial interest in the Plan or any related agreement.

While there is no assurance that the expenditures of the Fund's assets to finance distribution of shares will have the anticipated results, the Board believes there is a reasonable likelihood that one or more of such benefits will result, and because the Board is in a position to monitor the distribution expenses, it is able to determine the benefit of such expenditures in deciding whether to continue the Plan.

For the fiscal year ended October 31, 2017, the Fund incurred \$91,218 in 12b-1 fees. The allocation of those fees is shown in the table below.

12b-1 Payments

Advertising and Marketing	Printing and Postage	Payment to Distributor	Payment to Dealers	Compensation to Sales Personnel	Other Expenses	Interest Carrying or Other Financing Charges
\$0	\$0	\$0	\$91,218	\$0	\$0	\$0

Sub-Accounting Service Fees

In addition to the fees that the Fund may pay to its Transfer Agent, the Board has authorized the Fund to pay service fees, at the annual rate of up to 0.10% of applicable average net assets or \$22 per account, to intermediaries such as banks, broker-dealers, financial advisers or other financial institutions for sub-administration, sub-transfer agency, recordkeeping (collectively, "sub-accounting services") and other shareholder services associated with shareholders whose shares are held of record in omnibus, networked, or other group accounts or accounts traded through registered securities clearing agents. (Prior to June 1, 2017, the maximum service fees authorized by the Board to be paid by the Fund was 0.10% of the applicable net assets or \$35 per account, whichever was lower.) Any sub-accounting fees paid by the Fund are included in the total amount of "Other Expenses" listed in the Fund's Fees and Expenses table in the Prospectus.

For the fiscal year ended October 31, 2017, the Fund paid the following amounts for sub-accounting services:

Sub-Accounting Services Fees	\$239,293
-------------------------------------	-----------

MARKETING AND SUPPORT PAYMENTS

The Advisor, out of its own resources and without additional cost to the Fund or its shareholders, may provide additional cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. Such payments may be divided into categories as follows:

Support Payments. Payments may be made by the Advisor to certain financial intermediaries in connection with the eligibility of the Fund to be offered in certain programs and/or in connection with meetings between the Fund's representatives and financial intermediaries and its sales representatives. Such meetings may be held for various purposes, including providing education and training about the Fund and other general financial topics to assist financial intermediaries' sales representatives in making informed recommendations to, and decisions on behalf of, their clients.

Entertainment, Conferences and Events. The Advisor also may pay cash or non-cash compensation to sales representatives of financial intermediaries in the form of (i) occasional gifts; (ii) occasional meals, tickets or other entertainments; and/or (iii) sponsorship support for the financial intermediary's client seminars and cooperative advertising. In addition, the Advisor pays for exhibit space or sponsorships at regional or national events of financial intermediaries.

During the Funds' fiscal year, the following financial intermediaries were paid out of the Advisor's revenues:

Firm
National Financial Services, LLC
Charles Schwab
TD Ameritrade Clearing
Vanguard
UBS
Pershing
Raymond James

The prospect of receiving, or the receipt of additional payments or other compensation as described above by financial intermediaries may provide such intermediaries and/or their salespersons with an incentive to favor sales of shares of the Fund, and other mutual funds whose affiliates make similar compensation available, over sale of shares of mutual funds (or non-mutual fund investments) not making such payments. You may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Fund's shares.

As of the date of this SAI, the Advisor has an agreement with a registered broker-dealer to pay such Support Payments. The Advisor has an agreement with a third-party firm that is a registered broker-dealer to provide marketing support. Future Support Payments may be structured in three ways: (1) as a percentage of net sales; (2) as a percentage of net assets; and/or (3) a flat fee.

FINANCIAL STATEMENTS

The Fund's annual report to shareholders for the fiscal year ended October 31, 2017, is available, without charge, upon request by calling 1-855-681-5261 and the financial statements, accompanying notes and report of independent registered public accounting firm appearing therein are incorporated by reference into this SAI.

APPENDIX A CORPORATE BOND RATINGS*

Moody's Investors Service, Inc.

Aaa: Bonds which are rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edge." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa: Bonds which are rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuations or protective elements may be of greater amplitude or there may be other elements present which make long-term risks appear somewhat larger than in Aaa securities.

A: Bonds which are rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa: Bonds which are rated Baa are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Standard & Poor's Ratings Group

AAA: Bonds rated AAA are highest grade debt obligations. This rating indicates an extremely strong capacity to pay principal and interest.

AA: Bonds rated AA also qualify as high-quality debt obligations. Capacity to pay principal and interest is very strong, and in the majority of instances they differ from AAA issues only in small degree.

A: Bonds rated A have a strong capacity to pay principal and interest, although they are more susceptible to the adverse effects of changes in circumstances and economic conditions.

BBB: Bonds rated BBB are regarded as having an adequate capacity to pay principal and interest. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay principal and interest for bonds in this category than for bonds in the A category.

*Ratings are generally given to securities at the time of issuance. While the rating agencies may from time to time revise such ratings, they undertake no obligation to do so.

APPENDIX B COMMERCIAL PAPER RATINGS

Moody's Investors Service, Inc.

Prime-1--Issuers (or related supporting institutions) rated "Prime-1" have a superior ability for repayment of senior short-term debt obligations. "Prime-1" repayment ability will often be evidenced by many of the following characteristics: leading market positions in well-established industries, high rates of return on funds employed, conservative capitalization structures with moderate reliance on debt and ample asset protection, broad margins in earnings coverage of fixed financial charges and high internal cash generation, and well-established access to a range of financial markets and assured sources of alternate liquidity.

Prime-2--Issuers (or related supporting institutions) rated "Prime-2" have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, will be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternative liquidity is maintained.

Standard & Poor's Ratings Group

A-1--This highest category indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus (+) sign designation.

A-2--Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issues designated "A-1".
